## RECOMMENDATION

We at Telelink Services Group, together with ExpandX | Marketing & Web have worked on a project related to our Brand Ambassador campaign which also included the creation of a [new website](#). The whole team at ExpandX approached us very professionally – they duly advised us, created the strategy and project proposal, and fulfilled the assignment within the given deadlines, offering us the most up-to-date solutions of the industry related to web design, web development and digital marketing. They have managed to precisely communicate the marketing message and create a beautiful working digital image for the campaign. This further increased our satisfaction with their work.

As a result of this efficient cooperation we have assigned them other important projects and we are continuing to work together with them at the moment.

We feel comfortable with the team, their expertise and professionalism and we are confident we will get the best results we need in the context of Digital Marketing & Web Solutions.
