Below are just a few case studies that are reflective of the type of work we do. [Click on one of the links below to learn more.](#)

Family-Owned Construction Company – Recruited: Accountant

Client Background

This highly-successful Property Management and Commercial & Multi-Family Construction company first chose to work with Murray Resources in 2015. Devoted to hard work and integrity, this family-owned company concentrates on giving their clients a quality product on a competitive budget.

Challenge

Our client needed help identifying a well-rounded accountant who also had construction experience and could work well in a small business atmosphere. During the recruiting process, the client decided to switch to a new accounting software suite that was industry specific and rarely used in Texas. We were able to adapt to the new requirements and move forward.

Approach

After screening hundreds of reviews generated through direct recruiting efforts and referrals, Murray Resources submitted 5 highly-qualified candidates to the client. Each candidate had small business and construction-related accounting experience. Since the client is a family business, Murray Resources also evaluated the candidates with the intention of finding someone who would fit well in a family-owned business environment.

Result

The client selected a candidate who not only had the required construction management experience, but had also previously created and implemented manuals for the same accounting software suite that the client utilizes. This placement was not only successful, but subsequent to this initial search, Murray Resources has filled 3 job openings for the client, with a 100 % success rate.
