

## Franken Nutzfahrzeuge & Baumaschinen

### Replacement of isolated applications

The all-round service provider Franken Nutzfahrzeuge & Baumaschinen from Jülich offers its customers an all-round service package for commercial vehicles and construction machinery. The company serves the following areas:

- Sales
- Renting
- Repair Service

### The requirements for the ERP system

The new ERP system was to do the following:

- General order entry incl. integrated vehicle selection
- Customer base
- article master
- vehicle master
- Repair orders
- Vehicle and parts sales
- Workshop orders
- Preparation of offers/order confirmation/delivery note/invoice printing
- Management of incoming payments / dunning
- Receipt printing incl. direct e-mail transmission

**Brixxbox-Solutions** offered an individual all-round concept and used the **toolbox brixxbox** to map the requirements of the service provider.

### Reasons for choosing the brixxbox

- Future-oriented and flexible alignment of the software
- Coverage of company processes with maximum simplicity/ flexibility
- Fast implementation
- Easy adaptation thanks to modular design
- There is no comparable system on the market with so many possibilities for co-design

### This is what the implementation of Franken Nutzfahrzeuge & Baumaschinen has brought

- Homogenization of the system landscape: Reduction of the systems used
- No double entry
- Faster process control
- Integration of all data leads to faster information via dashboards and evaluations
- Error avoidance
- High customer loyalty through individual process adaptation
- Reduction of complexity
- Greater efficiency: More orders with existing capacities
