

Gastroenterology Associates of Central Virginia increases productivity and saves time by switching to gGastro

We've discovered that the prep time for the patient in the pre-op area is at least six minutes faster now. That six-minute saving is hugely satisfying for the patient and for us. Throughput is now faster, so we can do more endo procedures in a day.

Jennifer Brown, BSN, RN,
ENDOSCOPY NURSE MANAGER

Gastroenterology Associates of Central Virginia used separate software systems across their office, endoscopy center and hospital. As they grew, interface interruptions and manual data transfers led to errors and inefficiencies. The physicians decided to make a change and turned to gGastro®. With gGastro Endoscopy Report Writer (ERW), gGastro EHR, gPM™ practice management and ModMed® Pay, all data is in one place. This has saved time, increased procedures and improved efficiency. ModMed's responsive support made the transition seamless.

🕒 Saved six minutes per patient

↗ Increased endo center procedures

🗑 Eliminated hours of manual data entry

Goals

- Unify complex software systems
- Reduce interface interruptions
- Simplify manual data transfer

Results

- Lowered costs with all-in-one software
- Saved valuable time with each patient
- Streamlined scheduling and check-in
