

Murray Resources works with many of the leading companies in Houston, from Fortune 500 companies to dynamic small and medium-sized businesses.

Some of the industries we work with include banking, communications, energy services, environmental, financial services, food services, government, healthcare, insurance, legal, manufacturing, non-profit, oil and gas, retail, and utilities.

Read testimonials from some of the companies and job seekers who have shared their stories with us. You can also watch their videos.

Below are just a few case studies that are reflective of the type of work we do. [Click on one of the links below to learn more.](#)

### **Global Market Leader in Natural Gas Compression – Recruited: 30+ Roles including Accounting, Engineering, Admin**

#### **Challenge**

When Murray Resources was first introduced to the client company, the client was facing a situation where employees felt overworked and burned out, resulting in low job satisfaction and high turnover. The issues were particularly prevalent in the Accounts Payable department, where they were using a temporary agency to locate contract employees.

#### **Approach**

Murray Resources' staffing experts met with various managers within each department and worked with them to identify key requirements for each employment area. Once the research and the hiring requirements were set, Murray Resources began to fill positions in the Accounts Payable department first, to ease the burden of current employees and to gain consistency in the hiring process.

#### **Result**

Within one year, Murray Resources had filled over 30 positions in areas as diverse as Accounting, Engineering, Transportation, Logistics, Facilities, Accounts Payable, and Administration.
