Gospelify

Case Study

Case Study

Gospelify

Developing a CMS website for Music Blog and accessing Music Application and Discography from Itunes (Apple). This website has the ability to send the SMS to the Subscribed users while registration as well as by administrator. Also it has the functionality to send Song Download link to Mobile and the users has the ability to download directly to their PC. Featuring the comment system and the Rating system will be added advantage to show the website in the unique way.

Industry: Gospelify – On going project

Technology Used: Wordpress **Version :** 3.4.2

Client came up with an idea of adding the post in the blog related to Music categories such as audio, video, news, etc,. and use of the Discography of Itunes (Apple). Client needs to send the Email Newsletter and the Send SMS to the registered users. So we planned to do in the wordpress and developed the discography of itunes using the plugins in wordpress.

Challenge

When the user logs in, he is offered with all the service such us downloading the songs in mobile as well as PC and also has the ability to listen the songs from the Discography of itunes

Solution
