

ICU tech GmbH uses VectorCAST to meet IEC 62304 Certification

Challenge:

ICU tech GmbH, a leading hardware and software solutions provider, needed a software test solution that would support IEC 62304 compliance and to automate testing activities across the company's software development lifecycle.

Solution:

After an extensive evaluation process, ICU's engineering team chose the VectorCAST Automated Test Platform for its advanced functionality and IEC 62304 certification.

Details:

ICU tech chose the VectorCAST test automation platform for its advanced functionality and IEC 62304 certification. VectorCAST provides IEC 62304 tool validation in the form of qualification documents all necessary documentation for validating embedded software components used on all classes of medical devices.
