

CASE STUDY: SAP Analytics Cloud PoC Novo Nordisk

CHALLENGE

At Novo Nordisk, the upgrade from SAP ECC to SAP S/4 led to a range of cost controlling report- and analysis options becoming deprecated.

Even with the current reports and data used, cost controllers found their month-end work challenging, as the data needed for their work was spread across multiple data sources and systems, while also lagging real-time data insights.

Extracting, merging, managing and modelling data was time consuming and with risk of error and inconsistent data quality, causing insecure and delayed decision making at month-end.

To make the cost controlling process more effective and optimized, the need to have a more unified and centralized reporting and analysis platform with live S/4-data and drill-down analysis functionality was pertinent.

"I've been highly satisfied with Innologic's service. They have exceeded both expectations and deliverables with a solid solution, guidance, and outstanding autonomous collaboration throughout this complex SAC project."

Casper Behrndtz
IT Project Manager, Novo Nordisk

SOLUTION

After a comprehensive market search, Innologic was found able to deliver the needed competencies, to help with establishing and conducting a SAC PoC, binding together the requirements of Novo Nordisk, into a single, cohesive and unified reporting solution, visually presenting status overviews, detailed data and drill-down analysis capabilities, all while supporting good system performance across regions from USA, over Europe to China.

The SAC Story brought together a range of data sources, including a live connection directly to S/4, enabling cost controllers to complete their month-end analysis on a single platform.

Following the successful conclusion of the PoC delivery, Innologic was additionally invited to aid in the creation of management and business case material for the first phase of SAC Platform implementation process in Novo Nordisk's SAP program, NextGenSAP.

"Working with Novo Nordisk on the project was a great experience. As the project enjoyed a lot of positive attention in the organization, we delivered a good PoC, due to the close cooperation between engaged and dedicated project participants."

Rasmus Byriel
Senior Consultant, Innologic
