

FWS PROVIDED INSTALLATION GUIDELINES OF KITCHEN/BATH FITTINGS AND FURNISHING TO A TOP US-BASED COMPANY

The Client

The client has about 70 sites across the UK and USA along with a rich business history that began more than a century ago. They are an established partner for construction projects of all sizes and have a reputation for high-quality craftsmanship that has made their brand a worldwide success story.

The Challenges Faced by the Client

The client wanted to formulate guidelines that would make installation of their kitchen and bath furnishings and fittings an easier and smarter process. They needed drawings, CAD blocks and service parts documentation.

The project challenges included the following -

- + The high-quality focus of the client required an experienced team with a desire for perfection and exceeding expectations
- + Designs and revisions needed to be completed on time to prevent installation delays
- + The client desired similar help on an ongoing basis

FWS' Solution

The Flatworld Solutions team developed an efficient approach that is summarized below -

- + The project team included a team leader and three modelers
- + SOLIDWORKS Composer was used to create guidelines
- + Client provided 3D models of fittings including hardware via EPDM file transfer
- + Converted existing files to SOLIDWORKS file format
- + Created engineering drawings
- + Created profile drawings
- + Created CAD blocks
- + Finalized installation guidelines
- + Creates service parts documentation
- + Drafted product specifications for marketing needs
- + Conducted bi-weekly meetings for all team members

The Results

One of the primary reasons for clients to choose Flatworld Solutions is to work with proven experts on a recurring basis - in the case study just described, this has meant a 12-year working relationship.

Flatworld Solutions provides a blend of expertise, unexcelled quality, and [cost-effectiveness](#). We also provide fast response time, overnight communication, and 24/7 service in many cases. Our highly-skilled team of mechanical engineers and drafters help our clients meet diverse [2D/3D modeling and drafting requirements](#) with ease, so that you can skip the training and get started right away.
