Challenges

Optimize the duration of executing the S&OP cycles.

Reduce the number of tools and manual effort required for demand and supply planning.

Establish a unified model for demand and supply planning starting with three major business divisions.

Global visibility and collaboration to the planning cycle tasks, decisions, and final outcomes.

Forecasting simulation capabilities requiring minimal effort to collect data points and set calculations

Reduce planning errors and improve forecast accuracy.

Solution

Leveraged Intrigo's IBP S&OP solution powered by SAP

Resolution

Leveraged IBP S&OP model to create a centralized supply planning and demand planning process with visibility, accessibility to information based on user roles which allows the planners to work in parallel utilizing the JAM collaboration feature. Heuristic and optimizer were implemented to execute supply planning which improved the planning process and supply chain costs.

Key Benefits

Established a unified demand and supply stream as a global model within the business unit.

Increased short term and long term accuracy by reducing errors and increasing global transparency.

Collaboration across the three business divisions performing planning cycles in a single platform.

Leverage IBP reporting, analytics and What-if Scenario planning features for cadence planning historical reviews and report-outs.

The Intrigo Advantage

- Knowledgeable team with experts in all sectors in the implementation.
- Shorter implementation cycle using agile methodology.

About Intrigo

We empower enterprises for the future.

Intrigo Systems, Inc. is a premier SAP Partner and a leading provider of Advisory, Implementation, and Managed Services. Intrigo has partnered with SAP in the design of their Advanced Planning and Optimization (APO), Integrated Business Planning (IBP), and Collaborative Supply Chain (CSC) environments. We are focused on delivering customer value in the dynamic SAP Enterprise technology landscape.
