

CASE STUDIES: Visibility to Network Risks

● Am-Liner East, Berryville, VA

CASE STUDY DURATION: 90 Days

AM-Liner East, Inc. is a company located in Northern Virginia which provides quality full service sanitary sewer and manhole rehabilitation to the trenchless industry. To date over 3,500,000 LF of the AM-Liner and Premier-Pipe USA Products have been installed. AM-Liner is the leading folded/formed PVC (polyvinyl chloride) sewer rehabilitation system which utilizes trenchless technology.

*“I think it is great the connections that **Shield** is killing, but what may be even better is that business operations are running just fine in spite of all that is being killed. If my guys are happy and able to do their work while the network is protected, then my job just go a lot easier.”*

– Anson Elliott,
IT Manager

These are the number of attempts to infiltrate the **Am-Liner East** network that were killed by **INTRUSION Shield™**.
