WINDOWS APP SOLUTION FOR AN INVENTORY AND ORDER MANAGEMENT COMPANY

The Client

The client is a leading provider of inventory control and production management for manufacturers and wholesale distributors. They required a customized mobile application to track and control warehousing, inventory, sales orders and more.

The Need

Flatworld Solutions' challenge was to provide continuous access to inventory information and sales orders. The client also wanted a mobile solution that would allow them to provide important data to their clients - manufacturers and wholesale distributers.

The Solution

Flatworld Solutions developed a custom inventory management mobile app that brought control of inventory and order management into the hands of the clients. Using the specially designed inventory and order management app, the company could gain access to important information like inventory, customers, vendors, sales orders and purchase orders via the mobile phone. The mobile app solution also allowed the client to use a wireless internet connection to create customers, vendors, items, orders and more.

The inventory management app developed by Flatworld Solutions can be effectively adapted by:

+ Truck Deliveries
+ Warehouses
+ Trade Shows
+ Job Sites

The Result

By providing a personalized inventory and order management solution, the client now has access to all relevant information on the go.

The mobile application solution includes many advanced features like:

+ Order from suppliers
+ Bar scanning
+ Print receipts
+ Work order picking
+ Inventory counts and adjustment
+ Take orders from customers

+ Receiving
+ Location transfers
+ Shipping
+ Capture signatures
+ Track Lots and Serial numbers

Tools and Technology

Windows Mobile 5.0 OS, VB .Net 2005, SQL Server Compact Edition, ASP.Net, XML for Web Service
