

FWS PROVIDED AN IOS AND ANDROID APP TO CREATE MUSIC PLAYLISTS FOR A US CLIENT

The Client

The client is one of the leading entrepreneurs based in the United States. They are a father-son duo who are technically accomplished with their diverse skills and wanted to revolutionize the social music domain.

The Requirement

The client was looking for a reliable mobile app development service provider who would have the expertise to develop apps on both platforms, Android and iOS. They wanted an app on both platforms

which would help users to create music playlists and their nearby friends could collaborate.

The Challenges

Our team of mobile app developers had to face a few challenges while developing the mobile app for Android and iOS. Some of the challenges include -

- + The client was looking for an app with several functionalities such as loading songs from iTunes, Apple Music, Spotify, etc., implementing ISRC, SignalR implementation, etc.
- + The client wanted our team to deliver the mobile app within a quick turnaround time for both the platforms

The Solution

Our team developed the app on Android and iOS within the stipulated time. We incorporated all the features and functionalities into the app as asked by the client. Some of the key functionalities -

- + The app was able to transfer audio files between Android and iOS devices using a Wi-Fi hotspot
- + The app was able to load songs from different platforms such as Apple Music, Spotify, iTunes, etc. and make a collaborative playlist
- + Using the app, the users would be able to join the nearest playlist based on the location
- + We implemented the International Starting Recording Code (ISRC)
- + SignalR was implemented in the app which facilitated all the devices connected to get the real-time updates whenever any change was made to the playlist

Our team of highly experienced and qualified mobile app developers used the following technology stack to deliver the best quality mobile apps to the client -

- + Java, Swift
- + C# and .NET
- + MySQL
- + Facebook & Google SDK

Project Screenshots

The Results

The client was extremely delighted with the results as we delivered both the apps within the stipulated time. The users won't have to spend money on hiring a DJ for parties as they can use this app to make customized music playlists.
