

DEVELOPED AN E-LEARNING APP FOR A HONG KONG-BASED CLIENT

The Client and Their Requirement

Our client is a Hong Kong-based organization which was looking for a mobile app development company who could build an iOS app for their e-Learning business. They needed an app which could be used by students to book trainers for language learning courses in the form of one-to-one video lessons.

Project Challenges

Our team of mobile app developers faced the following challenges during the project development phase:

- + It was important that the e-Learning app had a great user interface as this app would be used mainly by students and trainers
- + In addition to the iOS app the client wanted us to develop a web interface to administer the app from the backend

The Project Plan

Keeping in mind all the client requirements and the project challenges the following project plan was devised by the Flatworld Solutions team:

- + A dedicated team of mobile app developers was assigned for this project
- + It was decided that the iOS app will be developed parallel with the web app to administer the mobile app. This would ensure that the UI and interface matched each other, leading to better client satisfaction

The Flatworld Solution

Our highly experienced team provided the following solution for the e-Learning iOS app:

- + We developed an iOS app for the Hong Kong-based client along with a web-based interface
- + Using this app the students can search for various courses based on parameters such as language, teachers, etc.
- + Using this app the students can enroll themselves for various language learning courses, select the required course, and book an appointment
- + The students can also pay for their courses through the payment gateway provided in the app
- + Students and trainers can have a one-to-one lecture session through video chat
- + If a student misses a class, the payment made can be automatically reversed
- + Gradually if the students are graded proficient in a particular subject, they can become trainers and open their own training classes

Choose Flatworld Solutions for Mobile App Development Services

Flatworld Solutions has been giving shape to innovative app ideas for over a decade now. Our highly skilled team of mobile app developers is proficient in developing apps on various platforms such as [Android](#), [iOS](#), [Windows](#), etc.

If you any such app ideas which you think are the need of the society, then feel free to [share the idea with us](#), and we will help you build it!
