SAP[®] Analytics Cloud

SAP[®] Cloud Platform

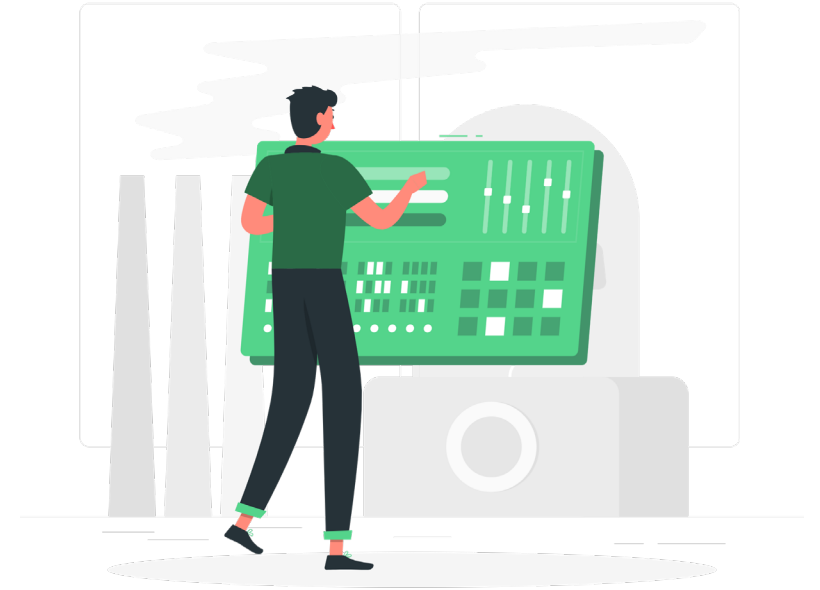

SAP Implementation for an Operations & Maintenance Enterprise

Problem Statement/Why SAP?

- Looking for a cloud-based SAP solution for Large Enterprises
- Looking to follow SAP Best Practices
- Globalization and Standardization of business processes
- Looking to adopt latest SAP innovations and solutions

Solution Statement

- SAP Products: SAP S/4HANA Cloud (Public), SAP Analytics Cloud, SAP Cloud Platform
- Modules Implemented: Sourcing and Procurement, Asset Management, R&D Engineering, Professional Services, and Finance
- Timeline: 1 year

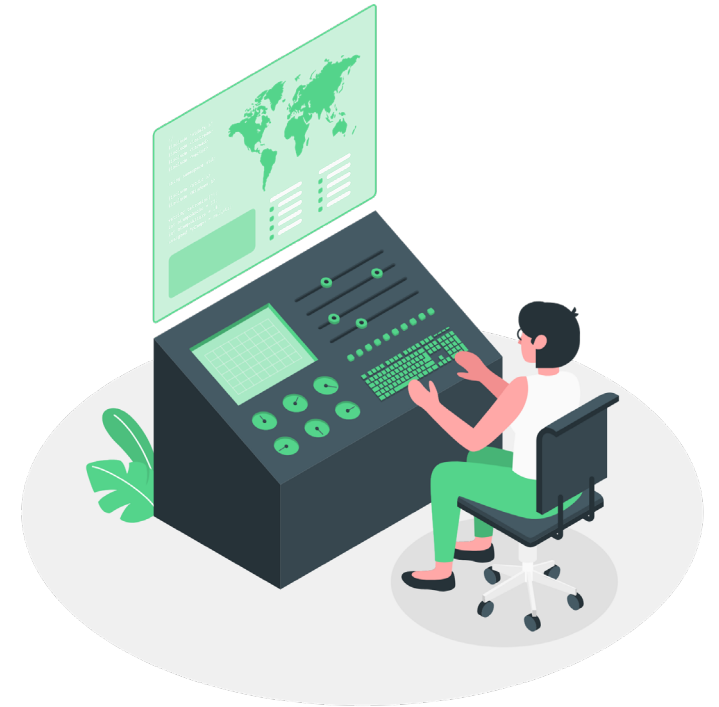

SAP Implementation for an Operations & Maintenance Enterprise

Key Features of the Project

- One of the biggest SAP S/4HANA Cloud (Public) implementations in KSA
- Speedy implementation with SAP Best Practice documentation available for Fit-to-Standard and Testing
- Successful Integration between SAP S/4HANA Cloud (Public) with SAP Analytics Cloud
- Successful integration between SAP S/4HANA Cloud (Public) and SAP Cloud Platform for custom application creation and side-by-side extensibility

Business Benefits

- Business processes across all company codes were globalized and standardized
- SAP Best Practices was implemented and followed with minimal customizations for effective usage
- Ease of use due to Fiori UX and applications saved a lot of time spent on SAP system to enter day to day transactions
- Standardization of COA for easier reporting across all companies
