

## Accessible learning platform for innovative disability education.

ReThink Ability offers leading-edge disability awareness training incorporating lived experiences and practical education. Designed to bring about real change, their training is for all organizations – public, for-profit businesses and non-profits of all sizes.

### CHALLENGE

ReThink Ability is advancing inclusion and needed a learning platform that could deliver on robust technical requirements without compromising the quality of their training. With accessibility as one of their core values, it was high on the list of technology requirements.

### SOLUTION

ReThink Ability launched a fully accessible training program with built-in eCommerce functionality. The interactive mobile training provides a wide range of support for all audiences – answering questions surrounding customer service, support for people with a disability in a professional capacity, and for individuals looking to educate themselves. Having the built-in eCommerce feature allows individuals and groups access to the training in a single LMS platform.

## RESULTS

### + eCommece integration & group pricing

Each module is integrated with a payment gateway making it easy to purchase and receive the training within the LMS. Group pricing is also available to larger organizations.

### + Engaging learning experiences that can be targeted to every audience.

Using technology that can be applied to students, professionals and individuals, their expert-informed training content can be integrated into every learning plan on a flexible, by-user basis.

### + Full accessible training for all audiences

Accessible on mobile devices and desktops, multilingual, ASL/LSQ, Closed Captioning, Screen Reading support to deliver their groundbreaking training.

“ We really wanted to work with a company that could understand our vision and help us build the right platform to support the learning outcomes and easily grow as new training and learners are added.

Denise Coward  
ReThink Ability Project Lead

An accessible, flexible platform that has a diverse range of supports for all audiences - front-line workers, advocates, and professionals.
