

## Leading Integrated Supply Chain Logistics Provider achieves seamless transition with our effective implementation process

### Why does Staff Management | SMX benefit your operation?

“Resource mobilization and continuity were critical to this start-up. Staff Management | SMX’s dedicated implementation managers were the boots on the ground with us making it happen at a fast and furious pace. As they moved from site-to-site we had complete confidence knowing that they brought invaluable experience, lessons learned and key processes to effectively support this start-up. Also key was Staff Management | SMX’s decision to tap a Director of Operations to lead the project who had been instrumental to the success of their solution in our Miami facility. He brought with him over 20 years of logistics experience with specific expertise in pool distribution operations.”

“The extent of the efficiencies and hard cost savings generated as a result of the Staff Management | SMX program cannot be underestimated—they deliver very significant value for us. We appreciate the open book nature of Staff Management | SMX’s cost model and their consultative approach. Giving them a seat at the table makes us more competitive, enabling us to price our bids effectively with a high degree of confidence in their ability to deliver.”

By deciding to give Staff Management | SMX a seat at the table makes us more competitive, enabling us to price our bids effectively with a high degree of confidence in their ability to deliver.
