**Industry:**

- Industrial Machinery

**Customer since:** 11/1998

**Number of licenses / users:** 70

**Locations:** Germany

**Number of employees:** 240

**Website:** Mafell

### About Mafell

When the implemented business software Comet reached its limits, Mafell decided to switch to abas after having probed the ERP market. The implementation took place on schedule in relatively short time and despite additional work the budget could be met. abas ERP is being used as the leading system and various additional solutions were connected via interfaces which are integrated in the standard.

*"OUR IT DEPARTMENT NOW WORKS SELF-SUFFICIENTLY FOR THE MOST PART. WE CAN CARRY OUT OUR COMPANY-SPECIFIC ADJUSTMENTS OURSELVES USING THE FLEXIBLE USER INTERFACE PROGRAMMING WHICH IS INTEGRATED IN ABAS. SINCE THE IMPLEMENTATION OF THE SOFTWARE WE HAVE CARRIED OUT SEVERAL LARGE RELEASE CHANGES. EACH UPGRADE WAS AN OPPORTUNITY TO ADJUST OUR INDIVIDUALITY, HOWEVER OUR UPGRADEABILITY REMAINED AT ALL TIMES. THE UPGRADES CAN BE COMPLETED WITHIN A SINGLE DAY AND WE CAN THEREFORE PARTICIPATE IN THE MOST UP-TO-DATE TECHNOLOGY IN A TIMELY MANNER THAT EXCITES US ABOUT ABAS."*

- Kurt Amman, Head of IT

### Products:

Machines for wood processing

### Project Highlights:

- Highest flexibility despite being the standard release.
- Annual release changes have been carried out since the implementation in 1998.
- The connection of further business processes such as logistics, CRM, PDM, payroll, and many more were carried out in abas.
