

“ Triantz’ methodology of successfully replacing our erstwhile SCCM with BigFix to deliver a comprehensive Endpoint Management Platform was exceptional! ”

Director – Technology  
Airport vehicle rental major

#### MY PROBLEM

We were finding it difficult to seamlessly roll out patch management across our 3,000-plus locations. Inadequate asset discovery and management, authorized assets and license compliance management, network congestion, and poor network performance were some of the other problems we were experiencing.

#### SIMPLY SOLVED

Triantz successfully replaced our then-existing SCCM with BigFix to eventually deliver a comprehensive Endpoint Management Platform.
