

FLATWORLD CREATED A MOBILE APPLICATION WHICH INTEGRATES WITH OMRON BP MONITORING DEVICE TO PROVIDE BP READINGS

The Client

The client is a young and well-known entrepreneur from the Kingdom of Saudi Arabia.

The Requirement

The client was looking for a mobile app development partner who could develop an app which could integrate with one of the BP monitoring devices and provide the BP readings. The client was looking for an app which could integrate with a low-budget monitoring device so that it would be used by many users.

The Challenges

Our expert team of mobile app developers faced several challenges while developing the app for the client. Some of them are listed here -

- + The client was looking for an innovative way to keep track of the blood pressure readings from the monitoring device for multiple users
- + Among the various BP monitoring devices, the client was looking for a low-budget device so that number of users could use it
- + The client wanted us to develop and launch the mobile app within 10 days

Our Solution

After carefully analyzing and understand the various requirements of the client, our team of highly experienced mobile app developers devised the following solution -

- + Our team performed research on various BP monitoring devices and decided to work with Omron BP monitoring device as it was low-cost as well as SDK compatible
- + Our team developed the app which was able to retrieve the blood pressure readings from the monitoring device in a single click
- + We ensured that the user interface of the mobile app was highly intuitive and easy to use for the users

The Result

Our team delivered the mobile app within the planned schedule of 10 days. The client was extremely happy with the results and lauded our team's efforts. The client also showcased the app to doctors and other venture capitalists.

Outsource Mobile App Development Services to Us
