

# Old Dominion Freight Line

*"With hundreds of locations nationwide and requirements to comply with a wide range of OSHA, EPA, and DOT regulations, ensuring compliance across facilities was arduous. Using ProcessMAP, we are positioned to reduce non-conformance risk and spend a fraction of the time we used to invest with the ability to leverage mobile functionality, automate processes, and link corrective and preventative actions (CAPAs) with audit findings."*

– Sam Faucette, Vice President of Safety at Old Dominion Freight Line

## Case Study

After growing from a single truck to a global transportation company with nearly 20,000 employees, a paper-based system could no longer handle Old Dominion's wide range of internal compliance and management system audits.

## About Old Dominion

- Old Dominion Freight Line operates 224 locations across the United States, offering regional, inter-regional and national LTL services.
- Annual Revenue: \$2.9 Billion
- Number of Employees: 17,500+
- Headquarters: Thomasville, NC

## Results

- Mitigates non-conformance risk through mobile audit functionality, automated processes, and linking corrective and preventative actions (CAPAs) with audit findings
- Decreased travel costs and increased efficiency by enabling remote tracking of non-conformances
- Promotes compliance with OSHA, EPA, and DOT regulations
