How Rayon helps Adrien Dupuy create architectural drawings x3 faster

Perspective from a 3 people design team

Challenge

Adrien Dupuy is an interior and product designer, founder of **Plato**, an office furniture company, and his interior design studio. Managing multiple businesses, time management, and optimizing efficiency is Adrien's biggest challenge.

His most time-consuming task is creating comprehensive architectural drawing sets, which he used to use multiple software for in a fragmented workflow that included purchasing multiple software licenses.

Solution

Adrien discovered Rayon, which enabled him to create architectural drawings faster thanks to its intuitive nature, comprehensive built-in block library, and easy exporting abilities. Rayon also allowed him to produce stylized and aesthetically pleasing drawings, all within a single tool.

This streamlined his workflow and saved on costs, as Rayon's license was priced more competitively than the software he had been using before.
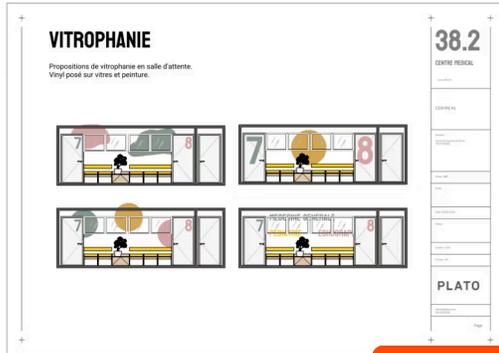

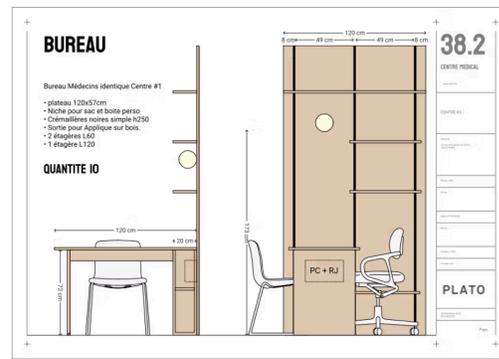

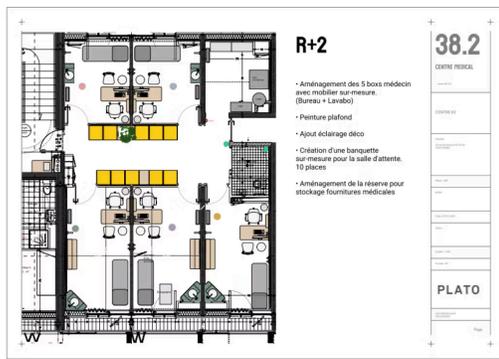

Design by Adrien Dupuy Studio

Outcome

By using Rayon, Adrien Dupuy Studio **reduced its software costs by 70%!** Additionally, creating architectural drawing sets and completing projects **is now X3 faster.** The drawing experience has become more agile, with richer outcomes and more comprehensive documents delivered at a higher level of execution.

" Rayon has significantly improved my productivity and reduced the time spent on drawings. Before, I used a combination of AutoCAD, Rhino, and InDesign. Now I can do almost everything (besides 3D) in one software. "

The story behind Adrien Dupuy studio

Adrien Dupuy is an interior and product designer and the founder of Plato, an office furniture company, and Adrien Dupuy Studio, both based in Paris. The studio specializes in creating office spaces for startups, as well as designing apartments, restaurants, and other diverse projects. Currently, they are developing an innovative, sleek design concept for a medical clinic chain. Dupuy's three key objectives are to design functional, aesthetic, and sustainable spaces that stand the test of time.

Adrien Dupuy Studio's need for optimization

With a passion for design and a strong entrepreneurial spirit, Adrien manages multiple businesses, which presents a significant challenge in terms of time management and efficiency. One of the studio's **most time-consuming tasks is creating professional architectural drawing sets**—such as floor plans, sections, elevations, design details, millwork shop drawings, and more.

Using legacy software like AutoCAD, Rhino, and InDesign, Adrien's studio faced a **fragmented workflow and bottlenecks** that limited their capacity to take on additional projects. The increasing cost of multiple software licenses added a substantial **financial burden**. Balancing these demands while maintaining high standards of work became a constant challenge for Adrien, who was determined to streamline processes and optimize his workflow to save both time and resources.

How Adrien Dupuy Studio uses Rayon to speed up their design process

Enter Rayon. Adrian says, *"Exporting PDF architectural drawings from Rayon was my first crush on the tool, and since then, I discovered so many more features that I use on a daily basis to speed up my workflow"*. Amongst these features are Rayon's block library, a built-in block repository with **thousands of blocks ready to be dragged and dropped onto floor plans** like furniture in top, front and side views (for floor plans, sections and elevations), and symbols and legends for technical drawings. Another major feature is the styling tool, enabling **2D rendering of drawings on the go** to edit their line wights, textures, colors, fonts, and more.

Other than the drawing, editing and exporting tools, the fact Rayon is a **web-based tool** made the implementation of it fast and easy; with no need for a robust machine, Rayon can be utilized from a browser on any laptop and accessed from anywhere.

Rayon at Adrien Dupuy Studio today

Today, Adrien Dupuy Studio uses Rayon to streamline architectural drawing creation. With Rayon's **intuitive interface, built-in block library, and easy exporting**, producing detailed drawings is faster, eliminating the bottlenecks of using multiple software. The style tool allows for **fast customization and rendering**, elevating the quality of the document set, while Rayon's web-based nature offers flexibility, enabling work from any device. Rayon has significantly **improved productivity, reduced costs, and helped the studio take on more projects more efficiently.**
