

Inview's Billing Team Uses RXNT's Customizable Software to Facilitate a Month's Work in 30 Seconds

RXNT's Billing Software | Lafayette, CA | Radiology

After being acquired in 2017, Antioch Medical Imaging—now known as **Inview Imaging**—embarked on a period of rapid growth and transformation. **While expanding from one facility and one biller to 29 facilities and 14 billers**, Inview Imaging quickly uncovered the limitations of their existing “archaic” software. With limited tools available for reporting, statements, and more, Zaveen Meyer and the staff at Inview Imaging knew they needed a more modern and intuitive software system that could help them scale effectively.

“We’ve always kept it old school and never really looked into getting new technology,” said Zaveen Meyer, Billing & Credentialing Manager at Inview Imaging. “When Dr. Piatt took over the business in 2017, we figured it was a great opportunity to see what else was out there.” After looking into various software options, **Inview Imaging decided that the best fit for their business was RXNT.**

“With RXNT, we knew we didn’t have to worry. We could tailor everything to our needs, which is the biggest reason we chose this software over others like Tebra (formerly known as Kareo) and AdvancedMD.”

On average, Inview Imaging sends approximately **2,000 statements per month**. With their previous software, this process was extremely time-consuming, requiring 4-6 people and up to a month’s worth of time to individually pull and verify each patient’s balance before physically mailing the statement. **Today, that process takes less than 30 seconds with the help of RXNT’s software.**

“As we’re growing and expanding the number of facilities we operate, having the ability to post something that would have otherwise taken a team of 4-6 people close to a month, has helped us significantly improve productivity.

I don’t know how we would be functioning on our previous software. We wouldn’t have been able to maintain a billing department with the staff needed, and without going over budget.”
