Major Food & Confection Company keeps safety top of mind with our unified safety culture

How does Staff Management | SMX support your safety program?

“Safety is a partnership between our organization and Staff Management | SMX; we are focused on the common goal of zero incidents. Our shared objective results in an effective partnership, not just with our Safety Manager but across the entire Staff Management team. They communicate on safety very effectively and safety is front of mind.”

“We have what I would call a robust and healthy tension on the topic of safety—they are always challenging us to achieve safety in the design, tools, layout and ergonomics of the tasks that our temporary workforce perform and conversely we are always pushing them to raise the bar on safety. They reinforce the safety culture they have created in their pre-shift meetings with the workforce, their safety meetings and safety committee.”

“For us, personal and food safety are critical. Staff Management | SMX takes a proactive stance with anyone who puts their personal or our product safety at risk—they have a zero tolerance policy for anything that puts their associates or our organization at risk.”
