

Efficiency Unleashed: **SAP Business One** in the Construction Sector

Aboelwafa and Sons Contracting was founded in 1974, as a value based company built on prestigious reputation and solid commitment to all parties involved, establishing a long term partnerships with every client, supplier and subcontractor while forming a big family that shares success and deals with utmost respect. Integrating SAP Business One into their operations has been transformative, enabling the company to streamline its workflow and optimize supply chain management.

Before: Challenges and Opportunities

- They didn't have an ERP and looked for a program that was robust, secure and precise
- Desire to shift to a business model based on integrable digital transformation with AI and other intelligent technologies

Why SAP Business One and Bbeter Seidor

- The quality and knowledge of SAP made it the ideal solution for developing an ERP
- Partner Bbeter Seidor offers comprehensive support, available 24/7 to address any problems or inquiries , whether it's through telephone, online communication, or by sending a representative onsite

After: Value-Driven Results

- More accurate data can be extracted at any moment for analysis
- It manages various controls, including data analysis, purchases, waste and many other aspects
- Operations are fully integrated within the system
- The management of panels for imports and exports functions in a significantly more efficient manner
