

German Engineering taken to the next level with SAP Business One

Before: Challenges and Opportunities

- Seeking greater process standardization
- Aiming for digital transformation in order to go paperless, communicate with customers using cutting-edge technologies and streamline operations
- Aspiring to consolidate all processes and documents onto a single, integrated platform

Why SAP Business One and Be1Eye

- Solution offers an integrated platform with 24/7 access from anywhere using any device
- Solution provides a customizable, scalable system capable of seamless integration with future tools and enhancements
- Partner achieved "complete success" in implementation and continues to provide ongoing support and guidance

After: Value-Driven Results

- Streamlined, faster operations company-wide, including new online management of materials and logistics
- Greater interconnectivity and system accessibility among employees, corporate offices and manufacturing facilities
- Extensive process standardization across all departments for greater speed and efficiency

"SAP Business One is the absolute future for us. I would definitely repeat the investment in SAP Business One solutions. Without it, we wouldn't be competitive."
