From sand to smart systems: Kore Mart transforms operations with SAP Business One and Produmex

Before: Challenges and opportunities
- Manual processes and handwritten orders. Order processing taking up to several days
- Lack of centralized data and real-time inventory visibility
- Limited insight into raw materials and finished goods
- Inability to support expansion with existing systems

Why SAP Business One and Domain Technology
- User-friendly and customizable ERP system
- Strong data structure to support growth and centralized visibility into production and inventory
- Domain provided expert guidance and responsive support
- Produmex WMS enabled better warehouse and stock control

After: Value-driven results
- Order processing reduced from days to minutes
- Real-time visibility into stock locations and inventory levels
- Enhanced support for 3D printing expansion with better data management
- Increased operational efficiency and decision-making accuracy
- Streamlined integration of newly acquired companies
- Improved customer service with faster, more accurate deliveries.

"Before SAP Business One, everything was manual and disconnected. Now, we have the data we need to grow, to **make smarter decisions**, and to **keep our customers happy**. Domain has been a trusted partner every step of the way."

Jay Phillips, Human Resources Manager and EHS Coordinator, Kore Mart Ltd.

Reduced

Order processing time
from days to minutes

Real-time

stock visibility
enabled across multiple locations
