

SAP Business One Powers the Pulse of Flexible Engineering at Kuzuflex

Before: Challenges and opportunities

- Fragmented and manual production planning and inventory tracking
- Limited traceability for materials, certifications, and compliance audits
- Slow customer response due to lack of real-time production insights
- Expansion goals hindered by disconnected data and inefficient operations

Why SAP Business One and Anadolu Sinerji

- SAP Business One offered a scalable ERP platform suitable for rapid global growth
- Supported advanced manufacturing needs including variant configuration and traceability
- Provided real-time inventory, production, and sales visibility across departments
- Implementation led by trusted local partner Anadolu Synergy with custom dashboards and add-ons.

After: Value-driven results

- Full digital integration of production, inventory, quality, and sales processes
- Time savings in warehouse operations via WMS and handheld terminal guidance
- Real-time production monitoring and proactive delay management via dashboards
- Improved decision-making and financial planning based on clear SAP reporting
- Enhanced supplier relationships with better demand forecasting and purchasing accuracy
- Accelerated international expansion, including new manufacturing site in Germany.

“SAP Business One gives us the **figures, speed, and flexibility to stay competitive and grow globally**. Thanks to Anadolu Synergy, we’ve transformed from a traditional setup into a data-driven manufacturer”

Karsten Meineke, Branch Manager, Kuzuflex Metal
