

Medical spa chain boosts operational efficiency with SAP Business One

Before: Challenges and opportunities

- Limited visibility into inventory and consumption
- Manual processes for cost and service tracking
- Difficulty scaling operations with multiple locations
- Lack of real-time business intelligence
- Inefficient control over day-to-day operations

Why SAP Business One and Consultare

- Centralized platform to manage inventory and services
- Real-time data and insights to support growth and scalable solution for multi-location expansion
- Improved cost visibility and service pricing control
- Guided implementation and ongoing support from Consultare

After: Value-driven results

- Full inventory control across all locations
- Service invoicing and costing made more accurate
- Seamless onboarding of new business units and increased confidence to scale to new locations
- Higher team awareness and accountability
- Continuous support from Consultare throughout the transformation

“For Medilight, SAP Business One has meant **organized growth with a clear future projection**. With the right tools and the right team, you can overcome fear and lead your business into a more efficient, tech-driven future.”
