

Mission accomplished: Nine Line Apparel fuels growth with SAP Business One

Before: Challenges and opportunities

- SKUs creation and order fulfillment processes were very slow
- Struggled to maintain production and inventory accuracy across multiple store locations
- Lacked data visibility to support timely business decisions

Why SAP Business One and ECS

- SAP Business One is scalable and approachable ERP for a fast-growing company
- ECS provided deep expertise and custom app development
- Enabled integration of production, inventory and order processing

After: Value-driven results

- Automated SKU creation reduced manual effort by 75%
- Cut SKU creation time from hours to minutes
- Implemented retail receiving and pick-pack apps for greater fulfillment efficiency
- Leveraged SAP data to ensure on-time delivery of orders
- Improved experience for their customers
- Enabled better forecasting and business decision-making.

“SAP has really helped us identify exactly what we need to produce, when we need it, and when to ship it out. And ultimately, honestly, is creating a better customer experience for our consumers.”

Myles Burke, CCO, Nine Line Apparel
