

## Preparing for future challenges and growth through a nimble move to the cloud with RISE with SAP

### Before: Challenges and opportunities

- Migrate swiftly from SAP ERP Central Component to the cloud to optimize manufacturing, order and contract management, and service operations and better support regulatory compliance
- Lay the groundwork for use of cloud services and technologies such as AI to support growth
- Adopt standardized processes across functions such as contract accounts receivable and payable

### Why SAP and scc EDV-Beratung AG

- RISE with SAP journey, enabling a rapid move to SAP S/4HANA Cloud Private Edition to help enhance speed, agility, flexibility, scalability, cost-efficiency, and stability in a unified IT landscape
- SAP Enterprise Support services and cloud application services, providing strategy and planning assistance, boosting productivity through best practices, and reducing costs with speedy deployment
- scc, helping translate Salzburg's requirements and goals into a successful digital transformation

### After: Value-driven results

- Ability to extend software applications on SAP Business Technology Platform using Java rather than ABAP programming language, simplifying development
- Better support for a clean core strategy and replacement of custom applications
- Significantly reduced risk and operational effort
- Solid basis for use of process automation and software such as the SAP Cloud for Energy solution

“We were the first Austrian utility company to take advantage of RISE with SAP, but we won't be the last. We've set an industry standard with successful collaboration, clear goals, and effective execution that helped us complete the project **ahead of schedule.**”

Manfred Braunwieser, Department Head, Core Business Solutions, Salzburg AG
