

## Targa GmbH; Cloud-powered transformation accelerates logistics and boosts accuracy

### Before: Challenges and opportunities

- Legacy ERP system no longer fit for modern operations
- Manual invoice handling and low process speed
- Inaccurate trade calculations impacting profitability

### Why SAP and Uniorg

- SAP Cloud ERP offers investment security, longevity, and reliability.
- Familiarity with SAP through prior use of SAP R/3
- SAP solution enables lean IT structures
- UNIORG selected for implementation; delivered flexible logistics and web shop processes
- Implementation completed on time and on budget

### After: Value-driven results

- Significantly faster processes with reduced error rate
- Improved logistics through pick-and-pack solution (co-developed with UNIORG)
- Improved project profitability through better costing
- SAP Treasury improved foreign currency transactions and liquidity planning.
- CIM (Central Invoice Management) enables automated entry and booking of invoices.

“The SAP solution is the single source of truth for us and we will continue on this journey with SAP and UNIORG in the coming years.”

Domenico Jahn, Commercial Director, TARGA GmbH
