SAP Business One

Uniseal
"Como Marca La Ética"

From growth challenges to operational excellence: Uniseal's success with SAP Business One

Before: Challenges and opportunities
- Limited control over financial and operational processes
- Lack of real-time visibility into inventory and supply chain
- Growing complexity in regulatory compliance requirements
- Outdated ERP system unable to support business expansion
- Need for a scalable solution to sustain double-digit annual growth

Why SAP Business One and ApiData
- SAP Business One offers advanced financial and operational control
- Provides full traceability and compliance with Mexican health regulations
- Scalable system that grows with the business
- API Data provides proactive support and ensures compliance with fiscal and regulatory changes

After: Value-driven results
- Improved financial reporting and administrative processes
- Enhanced inventory management with real-time tracking
- Increased efficiency in compliance with government regulations, e.g. NOM-241 for quality management
- Strengthened decision-making with more accurate data
- Greater confidence and security in system reliability for users

"With SAP Business One, **we have full control of our operations and compliance**. This system has not only optimized our processes but also positioned us **at the same level as major companies**. Our future is promising with SAP."

Juan José Ulloa, Director Comercial, American Healthcare Products S.A. de C.V.
