

WESPA GmbH – Accelerating industrial growth with SAP Business One in the metal and steel sector

Before: Challenges and opportunities

- Need for end-to-end visibility across global operations
- Complex international compliance requirements
- Short timeline for full ERP implementation
- Lack of unified system for business planning and analytics

Why SAP and UNIORG

- SAP Business One's ability to manage a large product catalog and simplify production processes across global operations.
- Enabled mapping of all business areas in one solution
- Selected UNIORG as a trusted implementation Partner
- Successfully deployed within three months, on time and within scope
- Integrated with UNIORG smart Logistics and DHL systems for time savings

After: Value-driven results

- Significant improvements in production time planning
- More accurate customer order planning and reduced stock levels
- Timely customer deliveries across 60+ countries
- Faster financial reporting enabling quicker decision-making
- Enhanced global compliance across time zones and legal systems

"The introduction of SAP Business One has brought about considerable time savings in our routine processes. We have achieved considerable improvements in the planning of our production times."

Karsten Maus, Production Director, WESPA GmbH.
