- **\$500k** per year saved in inventory write-offs.
- Reduced stockouts and overstocking by **30%** through purchase order planning.
- Minimized error rate and time spent by automating monthly accounting processes.
- No more manual COGS calculations, cutting errors & saving time.

Travis Walker
Operations Manager

“Saras' Inventory Dashboard has revolutionized our inventory management. Prior to this, manual tracking in Excel often resulted in discrepancies and costly write-offs. It simplified inventory tracking across our warehouse and Amazon, preventing meaningful stockouts and has enabled accurate forecasting. The most effective and customizable inventory management solution available.”
