

Software that Entertains

Challenge:

In order to meet market demand for its Next Generation Televisions, Arçelik needed software testing tools that enabled them to significantly reduced the time and costs associated with researching and developing new technologies.

Solution:

VectorCAST/C++ enables Arçelik the ability to automate the process of unit and integration testing source modules.

Details:

Headquartered in Turkey, Arçelik A.S. is a leading household manufacturer of white goods, electronic products, and small appliances. Arçelik chose VectorCAST for its ease of use, intuitive interface, and seamless integration.
