

Procurement & Inventory Management

Case Study

01

Business Need

A solution to manage procurement and give a comprehensive inventory control. An influential Dubai-based holding company with numerous successful enterprises, our client approached us for a digital solution to retain and enhance inventory control, and manage the procurement of their family-friendly animal farm. The farm required constant supplies, which made managing the inventory difficult.

02

The Challenge

Our team had to overcome the challenge of developing an application for users with limited technical knowledge, without omitting the detailed management options for invoices, purchase orders et

03

Our Solution

A .NET based inventory and procurement management application with a simple and responsive user interface. SolGenie's ample expertise in web application development coupled with a skilled team of developers allowed us to answer our clients' queries with a feature-rich application. The application development was done in various phases with our home-brewed project management methodology.
