

## Visibility Management System Case Study

Visibility  
Management System  
For The Largest  
Supplychain in US

# VISIBILITY MANAGEMENT SYSTEM

## Case Study

# 01

## Visibility Management System

### Application for Largest Supply chain in the United States

Technology is infiltrating every aspect of the businesses, and this project will improve the client's relationship. The project objective is to implement a Client Web Portal to provide their Clients with advanced and timely visibility into supply chain operations. Portal will replace several processes that are currently in place to collect, aggregate, and share data with its clients. Portal will also provide better visibility into clients order status and inventory.

# 02

## The Challenge

There was four unique set of personas we worked as part of this portal which cludes admin, warehouse operator, warehouse admin & client admin. The challenge was that the warehouse was spread across 3 different continents with 300+ ware house locations.

# 03

## Our Solution

A Microsoft Azure, .NET based computation and analytics platform which gives 100% visibility to the warehouse. Provide Insight Over Information by Improved story telling through data visualization, Simplify the User Experience by Consolidating Visibility, Better Engagement through a Single Collaborative Space.

“*Scorecard provides consistent measurement and improvement opportunity*”

## 04 | Basic Features Includes

Warehouse Analytics  
Data Collection  
Order Tracking & Analytics  
Inventory Tracking & Analytics  
Reports  
Assets - Enabling Collaboration

## 05 | Technology

## 06 Results

Complete visibility to warehouse operations  
(Outbound, Inbound, and Inventory)

## 07 Business Benefits

Improved story telling through data visualization

Focus on critical data points

A single solution to access supply chain data across systems

Order and Inventory search across systems

Self-service execution of standard reports across systems

Collaboration file space

*Customizable to support each client's  
unique requirements*
