

GOSPAY

Time and money
saving service

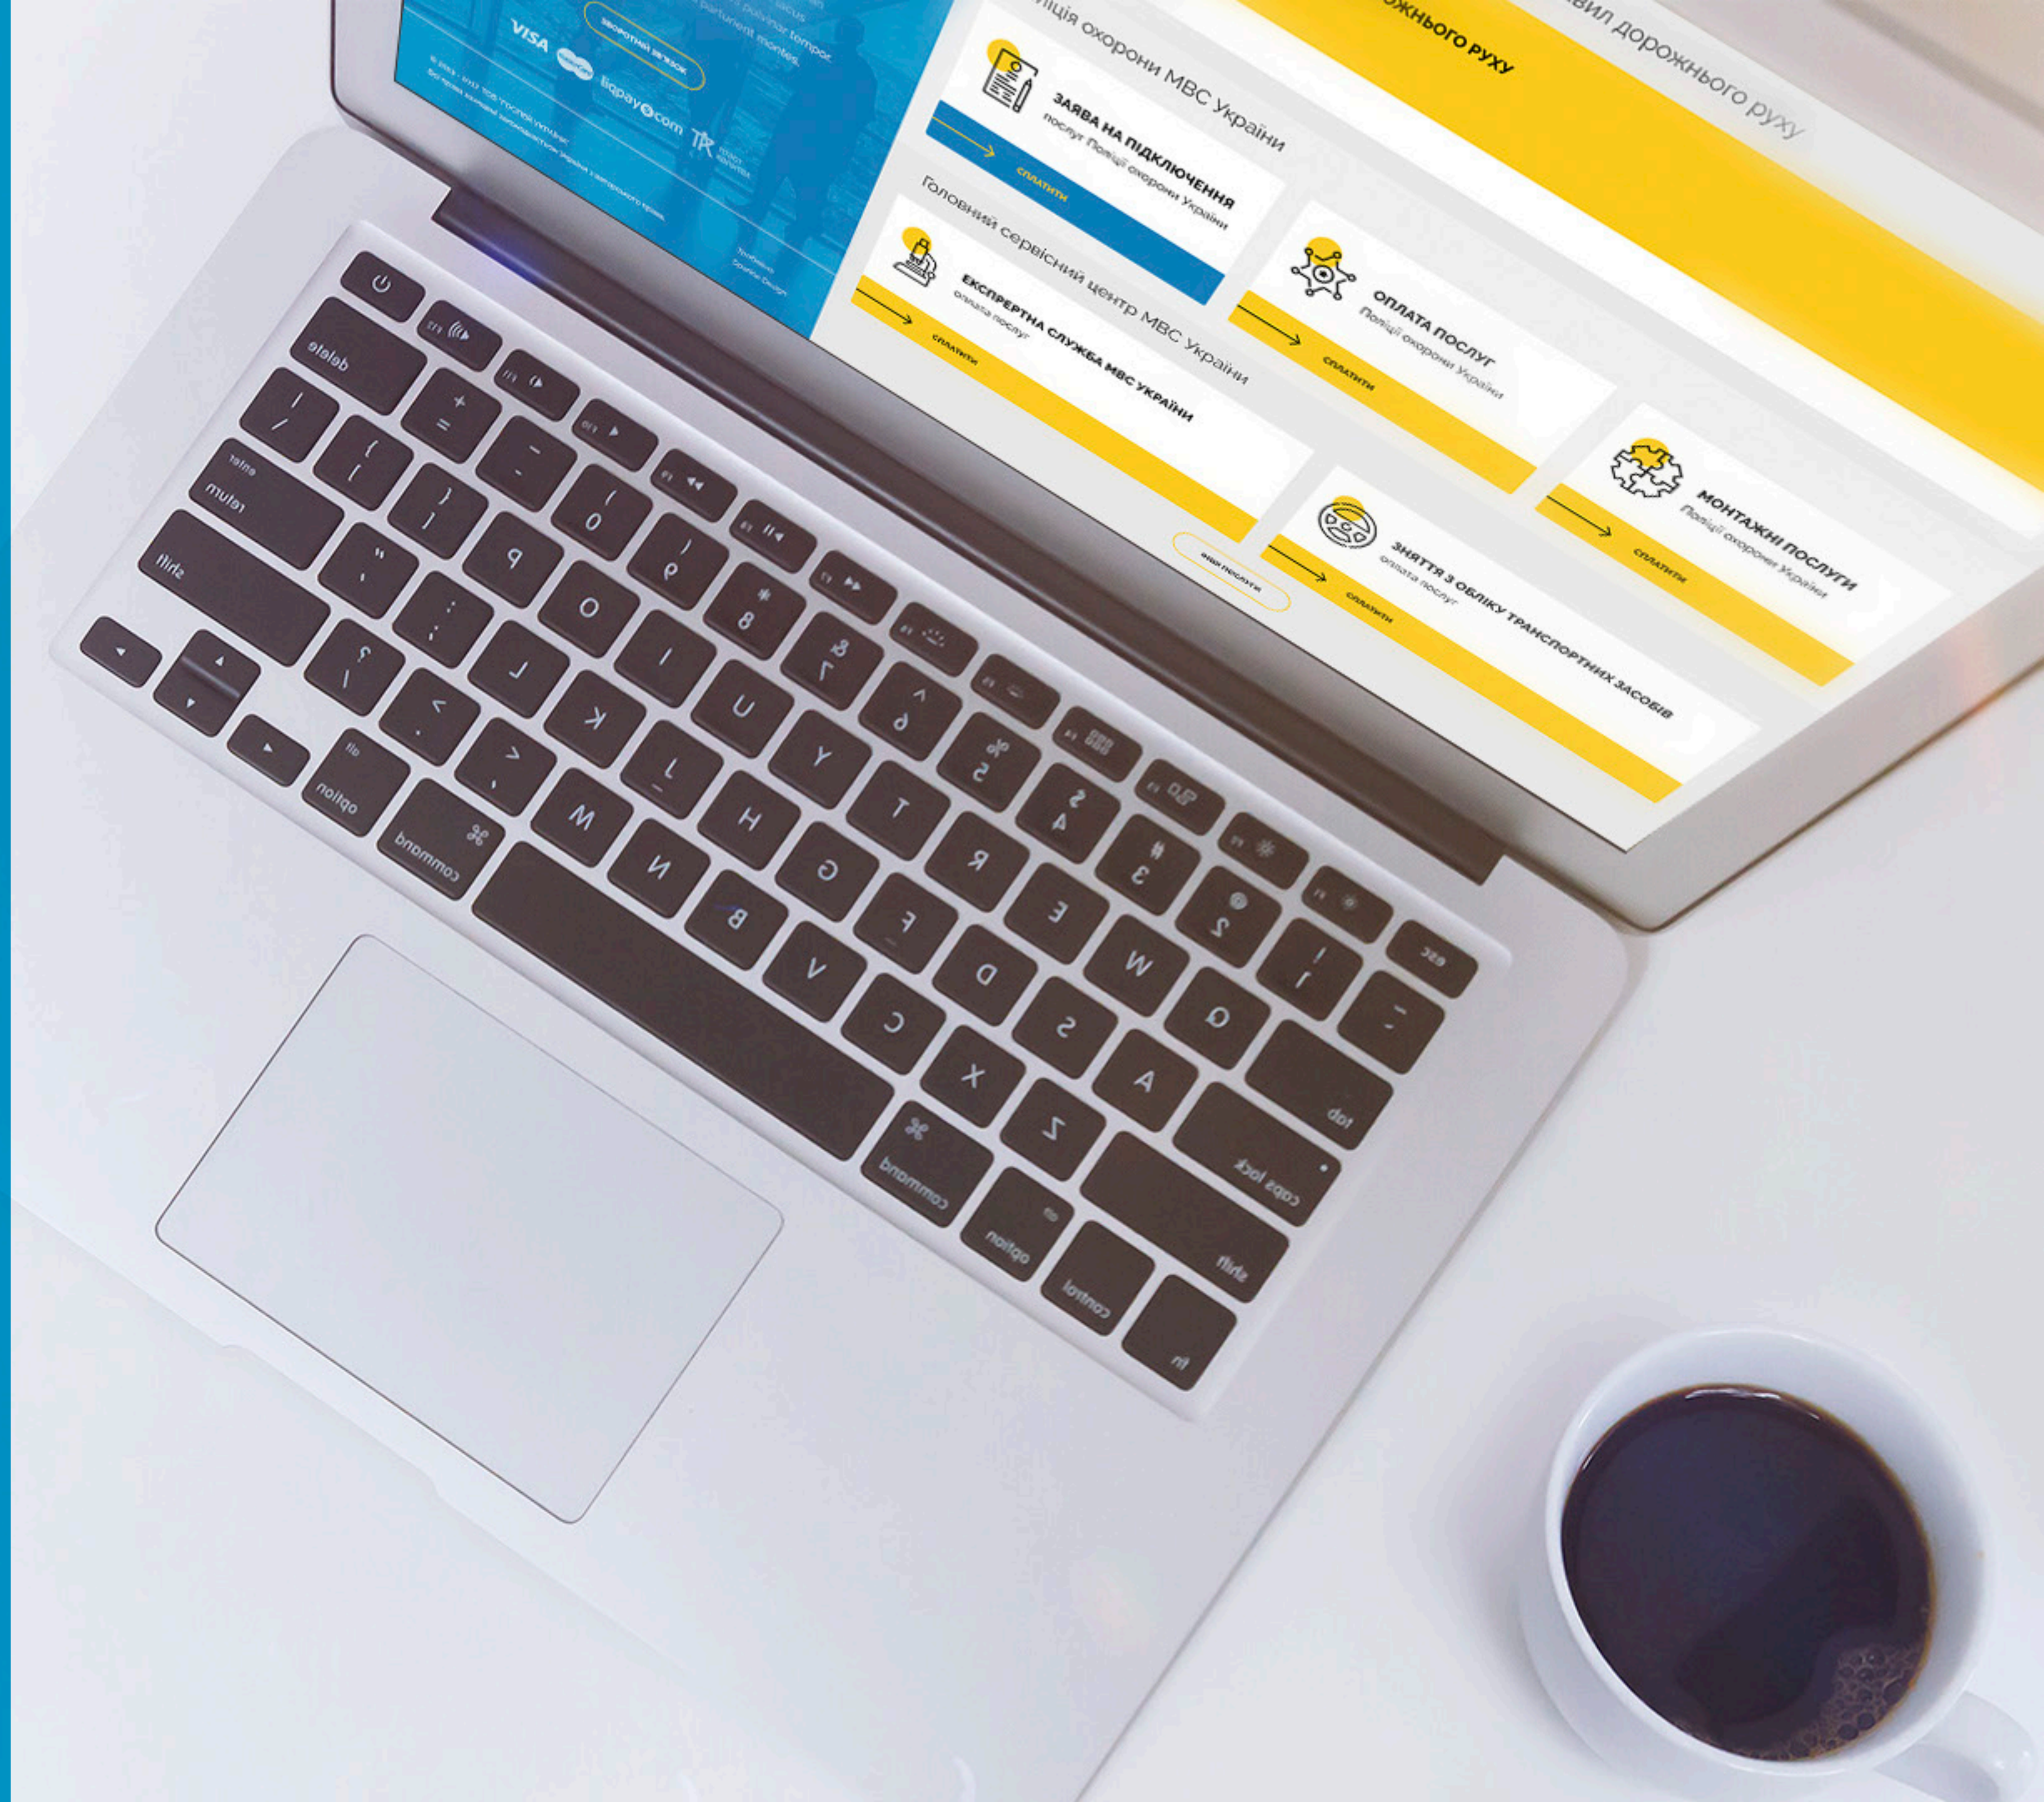

Development by
Sparkle Design

02

Task

Create an automated information and service system for online payment of administrative state and municipal services.

www.sparkle.design.com

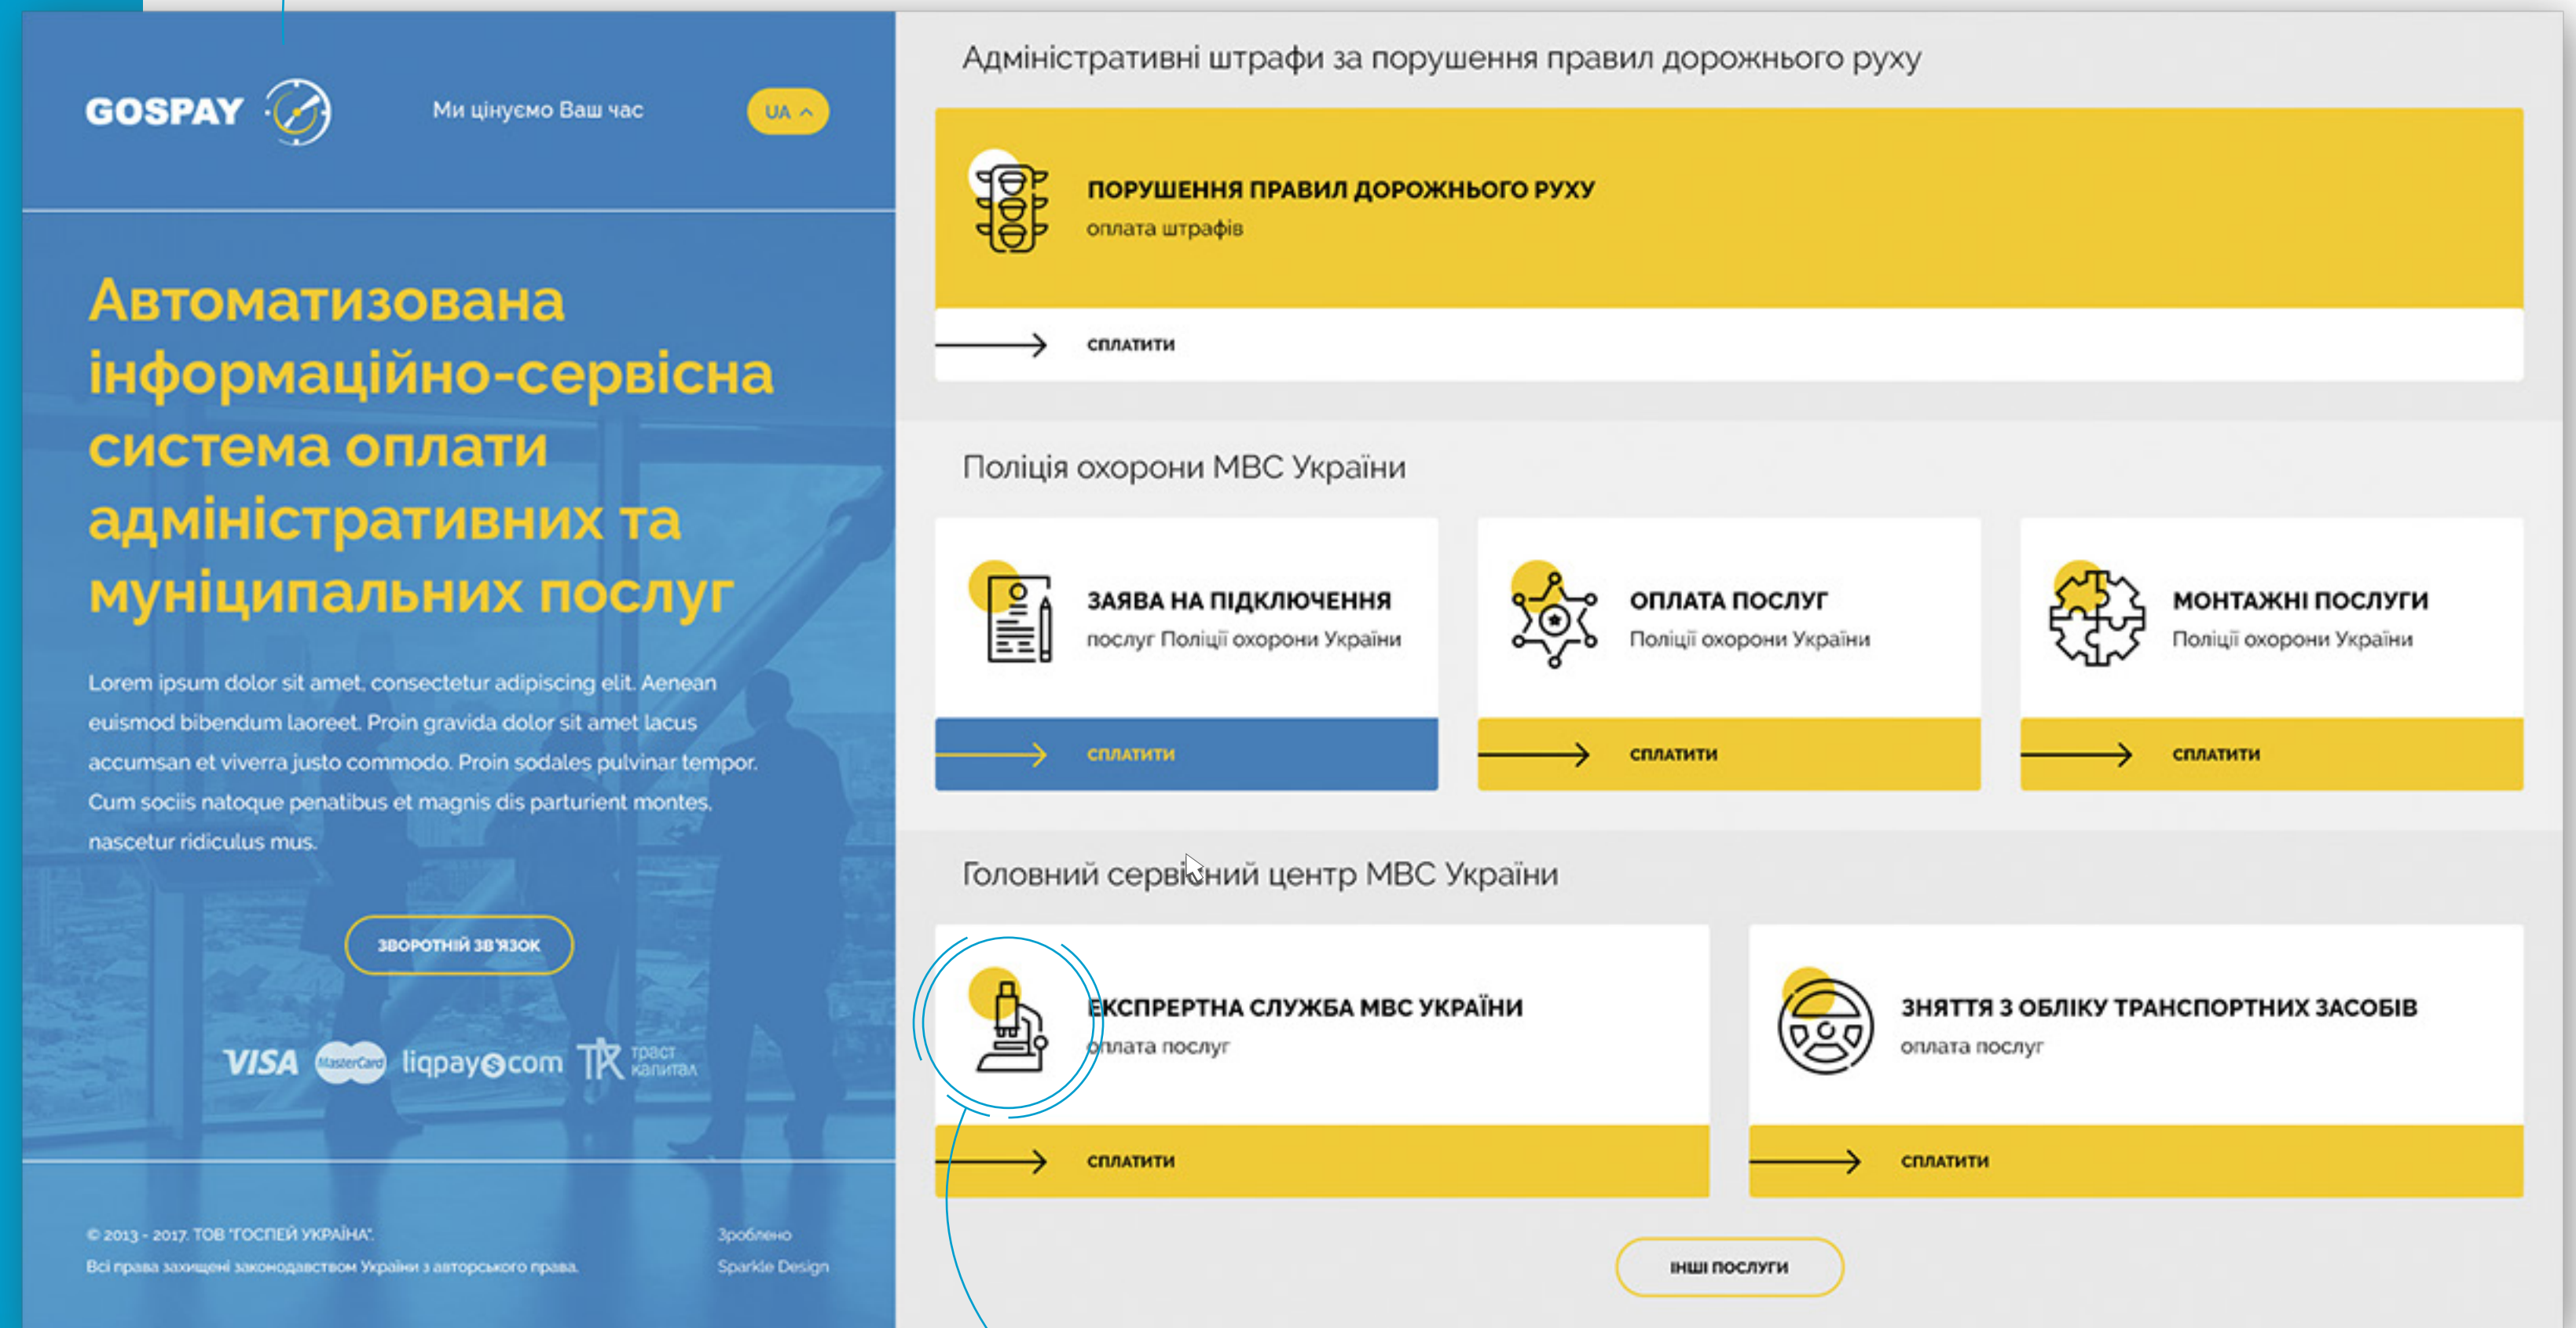

03 Main screen

The project interface was developed for 7 basic services.

User behavior scenario: one click on the selected service, filling in the fields, payment via payment system and the option of saving a receipt directly from the site or sending it to email

The animated logo spins when you hover mouse over it

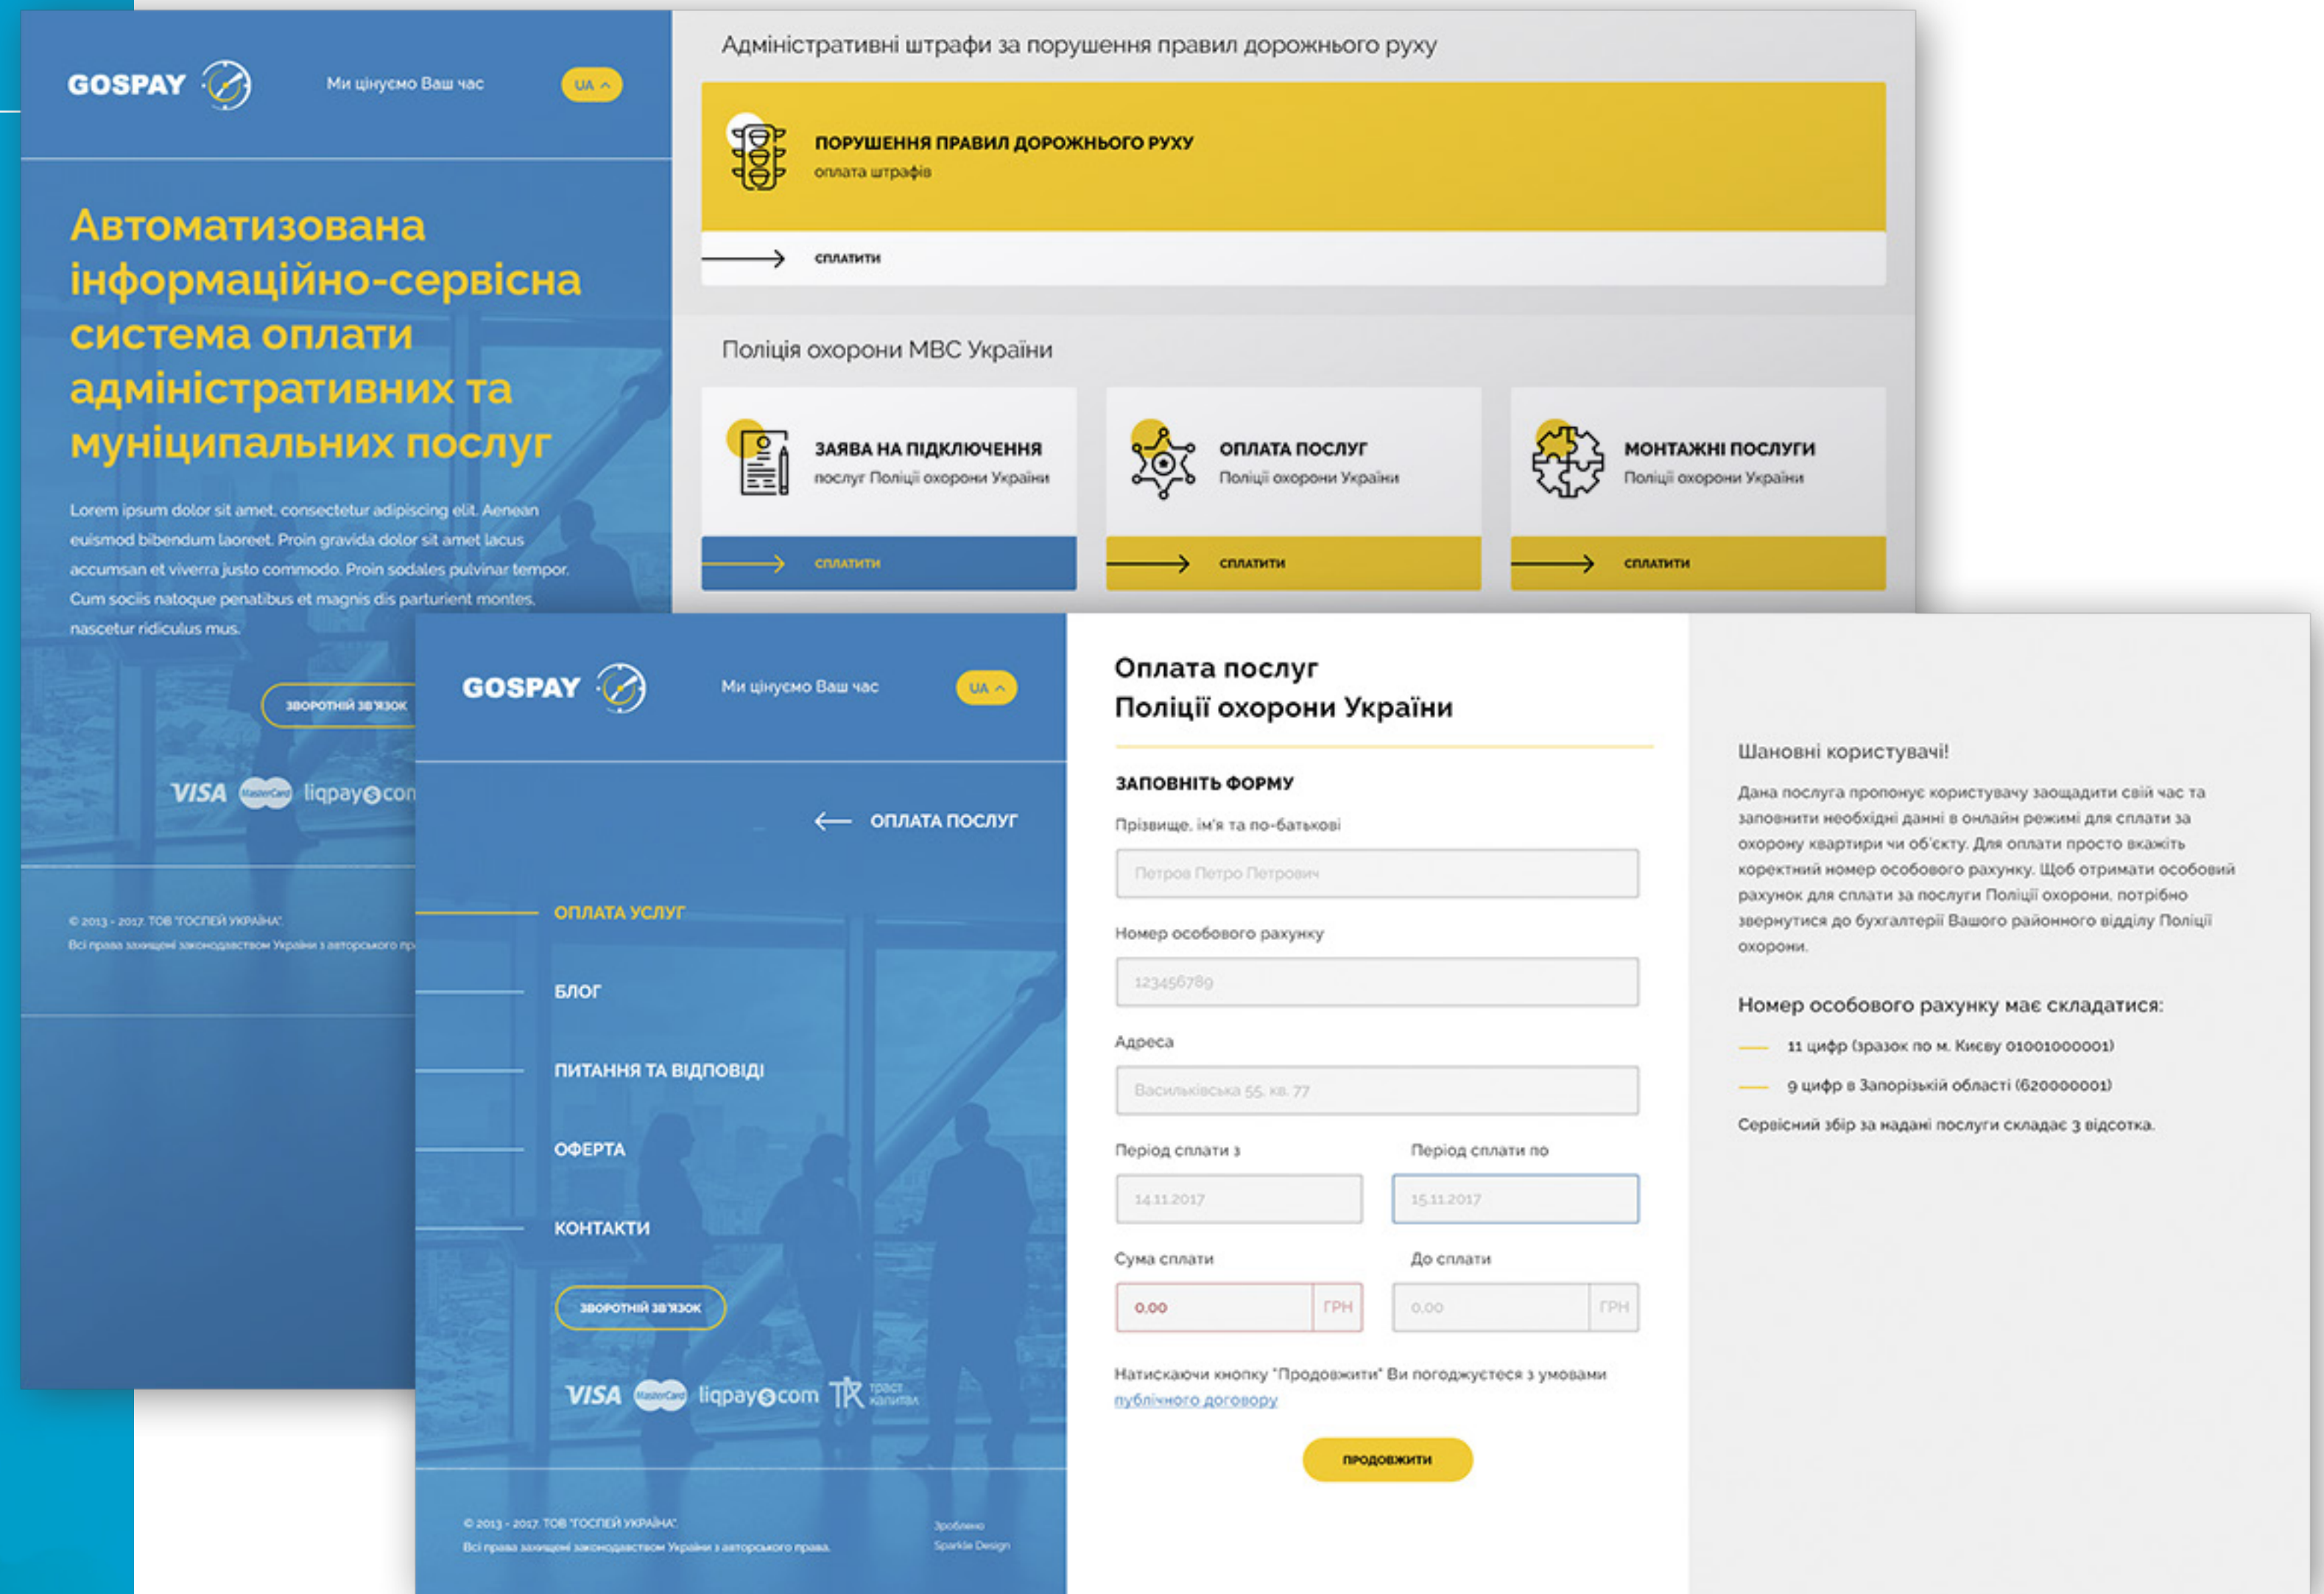

Interface icons for each category

04 Services page

The fields of each service are adjusted.

User pays in real-time mode.

Connection occurs via a secure protocol.

Accounts split

1 — User makes one payment, which is split into several payments: the service fee, the payment system fee and the payment for the service itself. If in one payment there are several services, then they are split into the required amount.

2 — Business automation.

The scheme of service automatic operation is designed and implemented. Gospay receives only the income revenue from the payments made.

Квитанція № 508028-01 від 15.01.2018р.

07 Project interface

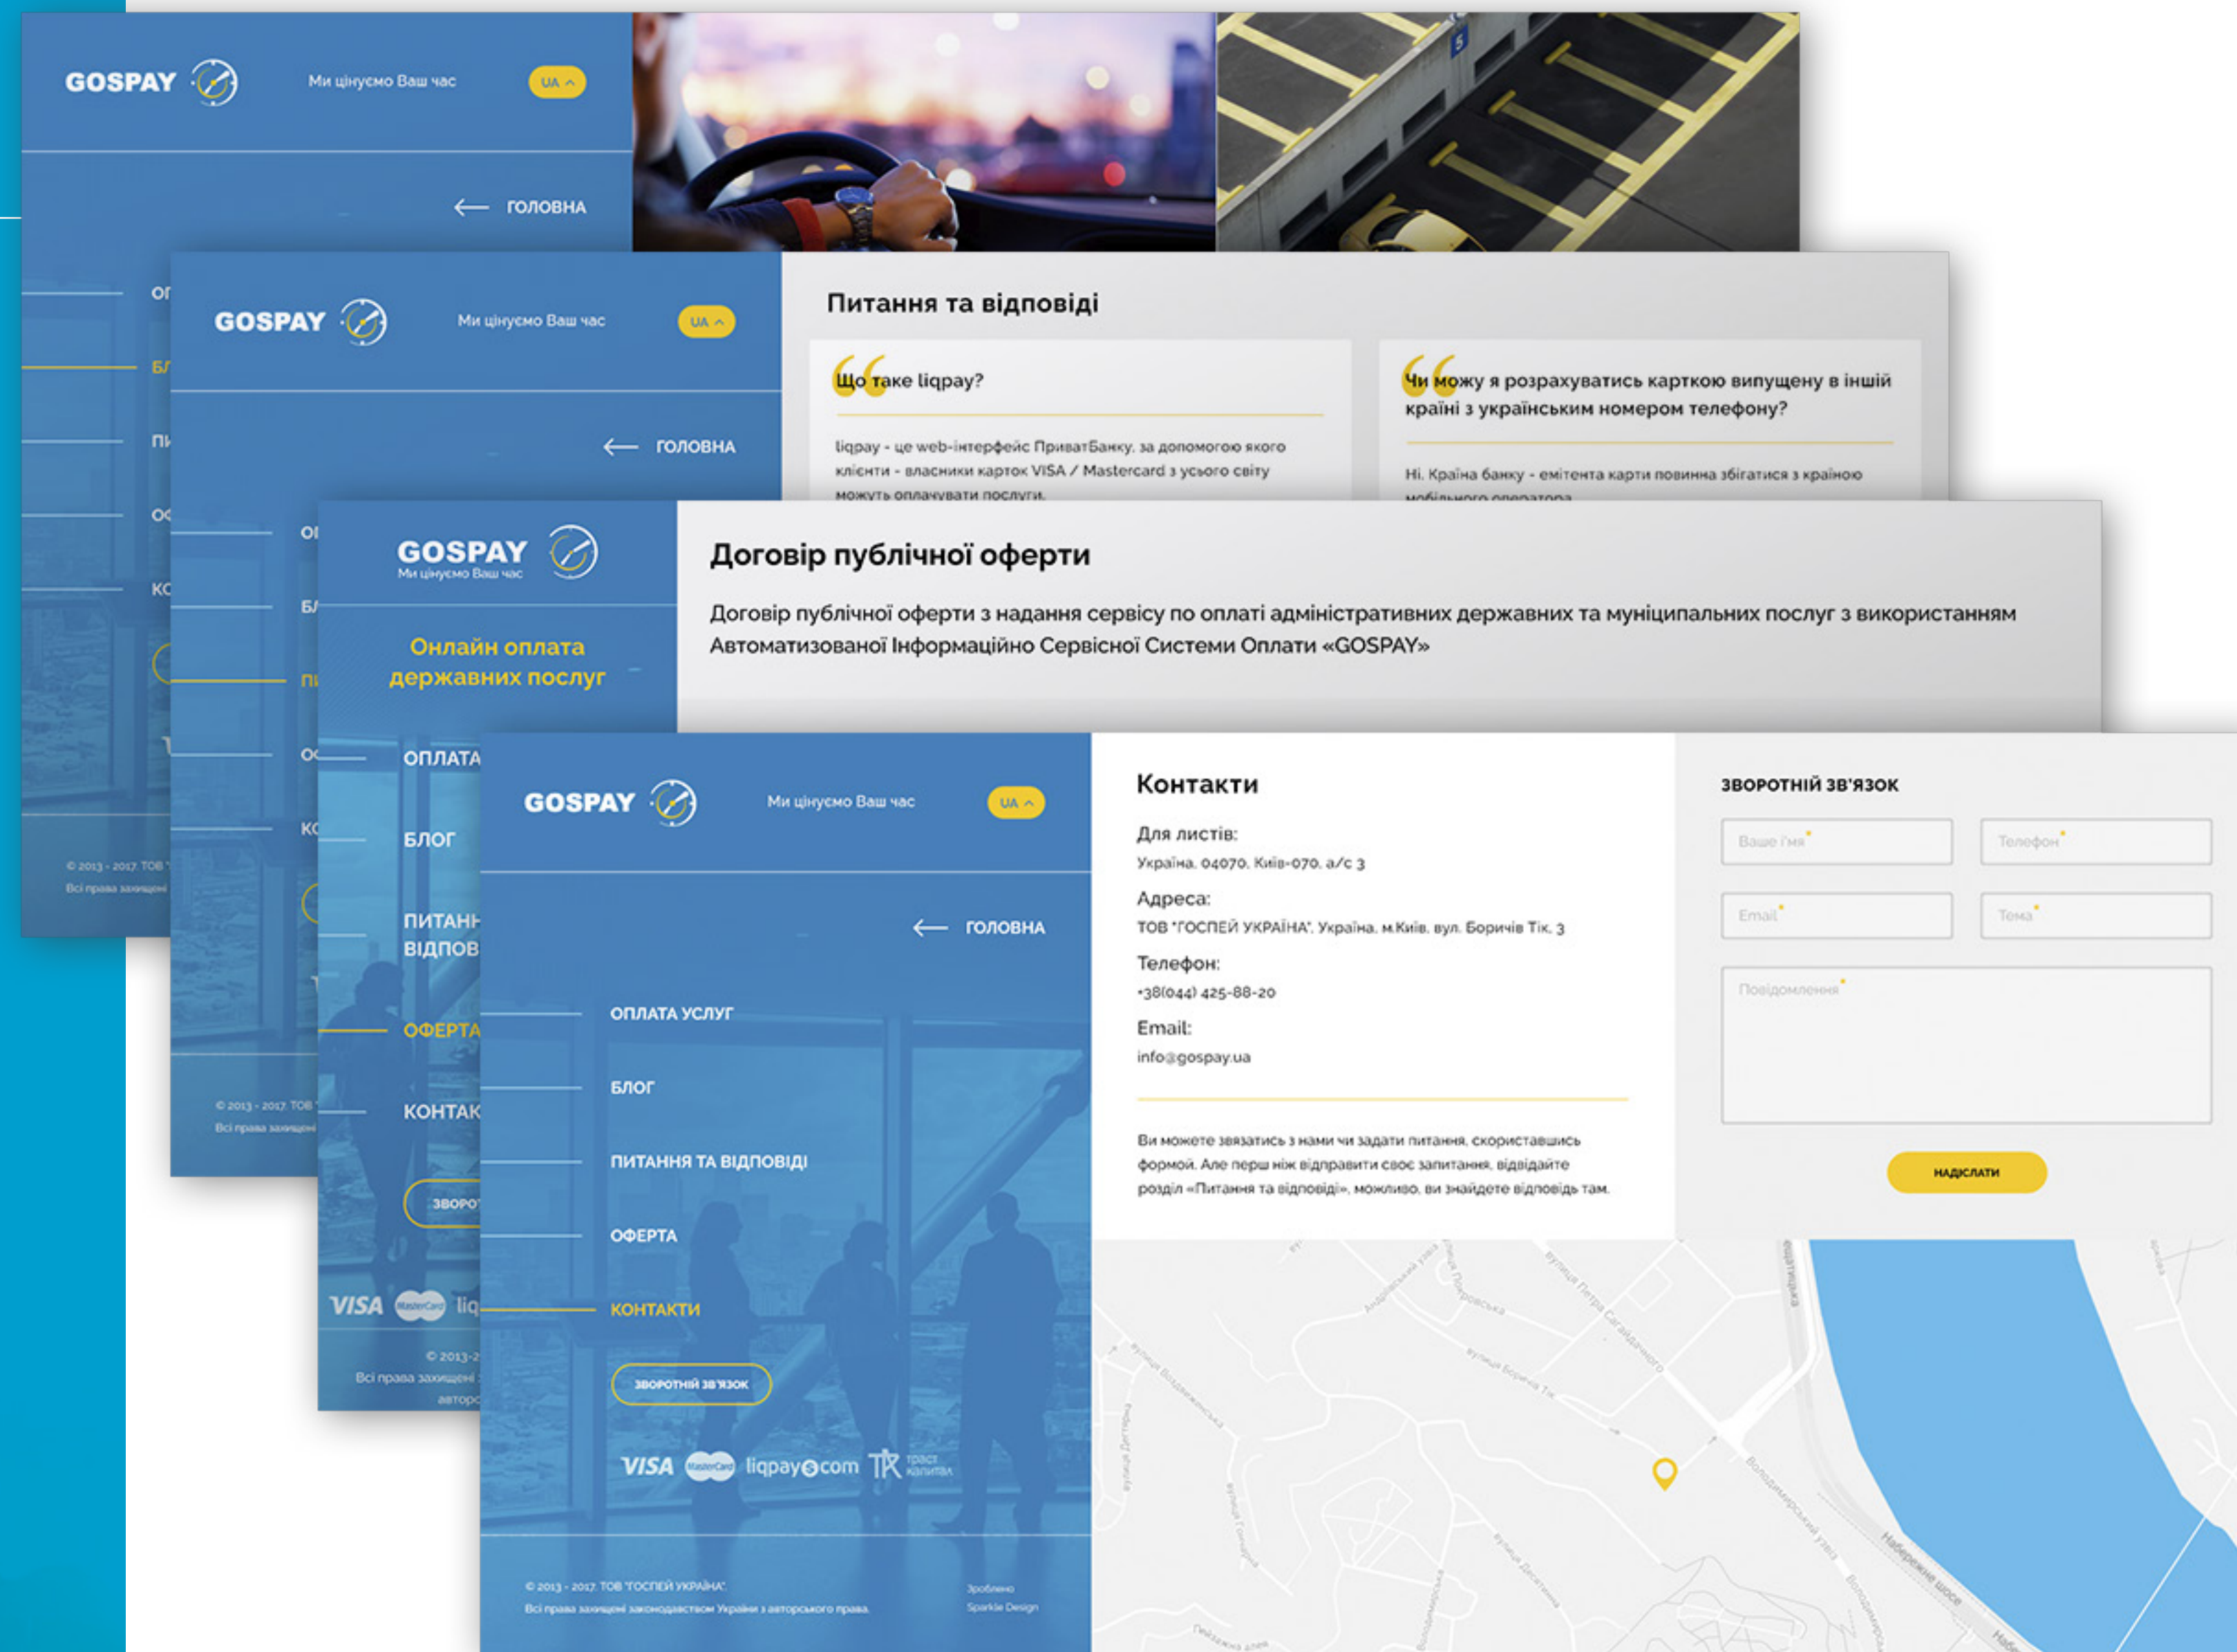

Friendly user interface.

The location of the items is well-thought-out, key-points are highlighted, the sizes of the fields and the color content are adjusted.

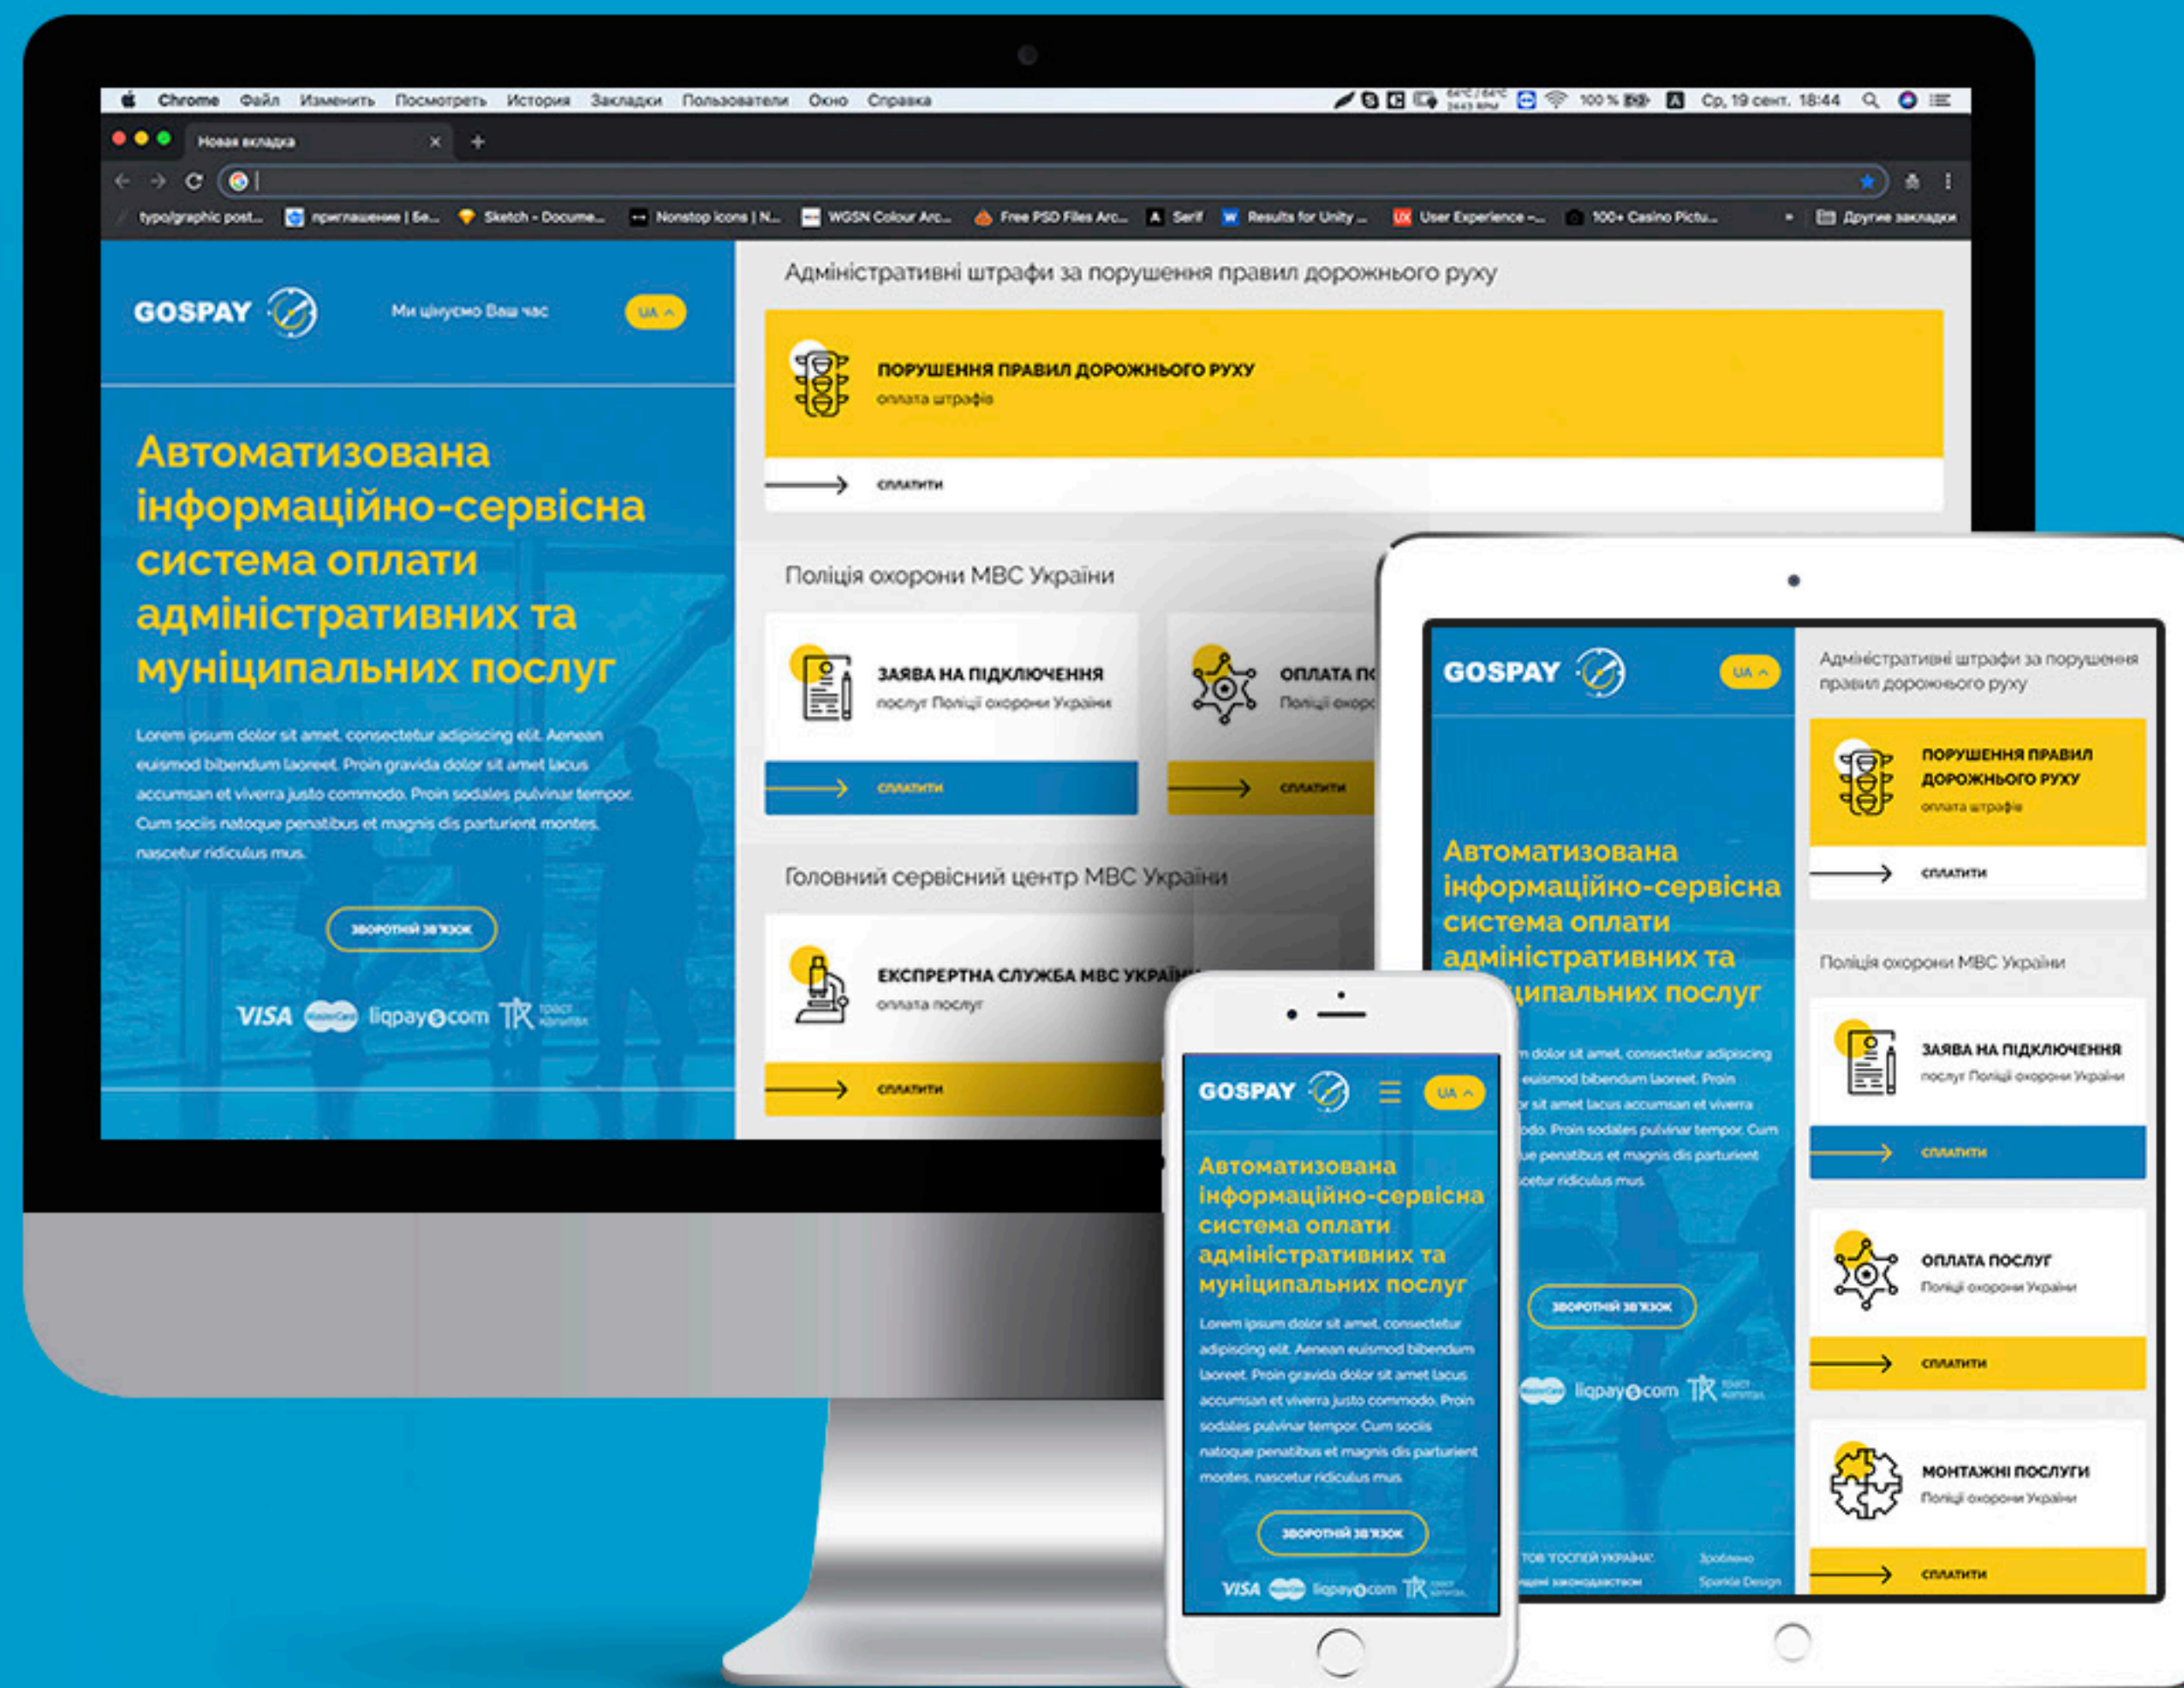

Additional fields

- 1 — Blog
 - Convenient blog for informing and educating users.
 - Interactive work interface.
- 2 — Questions and answers
 - Adding any number of questions and answers to them.
 - Categories of questions and answers.
 - Slider for answers.
- 3 — Offer contract
 - Accented contract with elements in the colors of the site.
- 4 — Contacts
 - Contact form, contact details and a large map.

09 Project specialties

- Accounts split
- Combination of several services in one
- Service interface

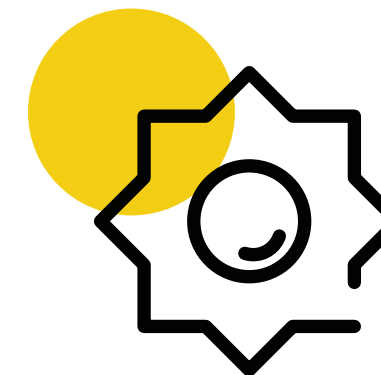

10 Result

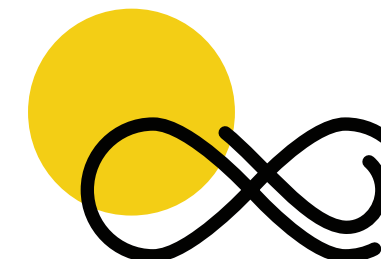

We created an impressive automated project, which makes it possible to scale the number of services.

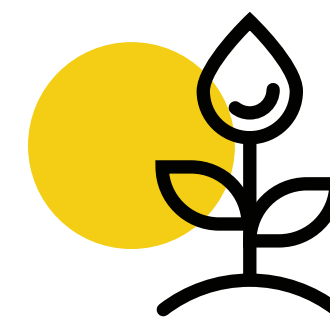

Explosive traffic on the very first day, impressive pace of work.

The service is fully automated.

Unlimited addition of the number of service categories and accounts to them.

Active development of project services.

Winner of the category “Non-profit organizations”

The project we developed won the prestigious nomination WebAwards.ua!
