In the latest technology in mind. The hotel located in the heart of Istanty, Subarahmet district signifies the importance we attach to our projects. Authentically spiendid ind elegant structure perfectly matches the historic texture of the location and is inspired by the Otoman and Sejuk architecture that has formed the starting point of its design. Traditional details have been elaborated with a fine workmanship and the help of the technology of the modern age.

French writer Pierre Loti. Adjubit novel also known as Constantinopie was originally published anonymously In 3879. The novel vividy describes the passion of the main character towards Tunish cursure, women and the city overall. The Otoman style honel was later renovated into a perfect amalgamation of the Otoman and Sejuk architectures with a strong presence of the Azerbaijani art elements.
