# What were the challenges you had generating sales and lead before using StealthSeminar?

It's important to have a system that provides people with several different options for webinar times.

I have clients from all over the world and StealthSeminar helps me run webinars at 3:00 AM in the morning if I want to.

The platform that I was using was being used by too many people in my sector. This was a big disadvantage. StealthSeminar was like a breath of fresh air.

## Did you have any concerns about using StealthSeminar?

The only concern I had was the learning curve and how much time my team and I would need to set it up.

One of the things that I liked the most about StealthSeminar is the excellent support they have. In the first few weeks, we had a lot of questions.

We used the live chat and they answered everything. The support team even took the time to send us a video explaining what we needed to do. That was awesome and I really appreciated it.

## What was your eureka moment?

---

The simplicity of the platform means that everything is focused on the webinar itself, which is perfect.

One of the most important things for me was the ability to do webinars on mobile, without people having to put the webinar on full screen. Also, the ability to fast forward or go backwards on mobile was a game-changer.

It was nice because the experience on mobile with StealthSeminar is almost the same as on desktop computers.

## How did StealthSeminar help you?

---

We were able to automate a lot of the sales process.

Right now we are doing webinars in Latin America and Europe. We can run them over two continents thanks to StealthSeminar.

We have been able to really polish and refine our sales webinars. Now all of them are running on autopilot. StealthSeminar has been a big help with achieving that.

## Would you recommend StealthSeminar?

---

StealthSeminar has a 30-day trial. I used this time to decide if it was a good option for us or not and to get used to the platform.

The cool thing was that I was already making money before I had to pay for my first month!

When we launched the first webinar, we made sales the same day. With just one hour per week in that first month, you'll get used to the new platform.

Based on my experience, any fear about changing will be gone in about a week.
