## ✔ Webinar Success Tip

**The number one tip** I give anyone when it comes to doing webinars (specially if they're hoping to use them for closing more sales) is ...

Teach to create vision and belief of how this will work for the prospect, not simply to inform.

The latter teaching strategy will overwhelm and kill your sales conversions while the former will create vision and belief that it's possible for your prospect to do this. And ultimately it's that vision that drives decision to buy.

No other automated webinar platform holds a candle to StealthSeminar. I can't recommend them highly enough!"*
