

“ Trianz proved to be our ‘Partner of Choice’ –not only for increasing productivity from workflow automation, but also for removing redundancy/duplication and increasing transparency between groups. ”

VP of Partnerships

A Large Life Insurance Company in the US

MY PROBLEM

Our company needed a centralized system for our mortgage loan transactions. With only a fraction of our documents digitized, manual reconciliation created costly inconsistencies and a lack of transparency.

SIMPLY SOLVED

Trianz was immediately on top of the problem – from implementing a centralized workflow system to configuring an audit trail that could track documents at various stages. The result was faster, more effective decision making related to mortgages, and beyond.
