About

Discover how Tarkett assisted Conad in the selection and installation of eco-friendly and 100% recyclable iD Tilt and iD Inspiration floors.

Segment/Area

STORES & SHOPS

A new Conad supermarket installed 4,400 square meters of Tarkett floors.

Conad Supermarket opened a new store in Rivoli, in the province of Turin. They were looking for floorings that were highly durable and technically sound, without compromising on the aesthetic. They chose Tarkett's iD Tilt and iD Inspiration 70 collections, which were created specifically for high traffic environments. Over 4,000 square meters of flooring was installed in various departments of the new supermarket.

The Tarkett team accompanied Conad through the selection process and contributed to the choice of flooring when considering design, site management, type of installation and logistics. Like all other Tarkett collections, iD Tilt and iD Inspiration 70 are eco-friendly, 100% recyclable, phthalates free and have lower than standard VOC emissions to help improve indoor air quality.
