Sustained engineering services for a CTMS

About Client:

Client is a global provider of software and services to the Healthcare, Pharmaceutical, and Clinical Research companies. It offers novel and user-friendly software solutions for collecting and managing data.

Business Requirements:

The client needed a robust, feature-rich and regulatory compliant Clinical Trial Management System (CTMS) to support clinical trial management from Phase I through Phase IV.

Solution:

- Implementation of CTMS that supported all trials from Phase I through Phase IV, and scaled from a single site to multi-site trials.
- Develop and test the application for adherence to regulatory requirements of 21 CFR Part 11 compliance and validation.

Technologies:

Microsoft Foundation Class Library, .NET Framework 4.0, Oracle 10 g, MS SQL Server 2005 and 2008, C#, VB 6, DevExpress, Telerik Rad Ajax Toolkit
