

SutiExpense Streamlines the Entire Expense Process from Start to End for Blue Rock Tx

The automated expense management solution has helped us to eliminate the manual process of maintaining spreadsheets, collecting paper receipts, printing expense reports, and more. We can now focus on profitability, instead of worrying about the typical inconveniences of traditional expense management.

Manual Expense Management Challenges Faced by Blue Rock Therapeutics

With the business expanding, Blue Rock found it difficult to manage their expenses using the traditional paper-based method. Employees found it complex and quite time-consuming to record expense transactions from hard-copies to spreadsheets and always carefully attach the receipts to the reports. This process was accompanied with problems such as missing reports, irregularities with receipt submission, and many more. The company realized that it needs to replace the manual process with automation to resolve the issues. They used automated solutions such as Concur and Expenspoint on a trial basis, but they were not able to fulfill the company's objectives.

About BlueRock Therapeutics

BlueRock Therapeutics is an engineered cell therapy company with the purpose of developing regenerative medicines for intractable diseases. BlueRock Therapeutics is advancing a novel Cell+Gene platform to develop, manufacture and deliver native cell and engineered cell therapies. By restoring lost function, these regenerative medicines have the potential to meaningfully alter the treatment paradigm for patients.

SutiExpense as the Solution!

Finally, Blue Rock implemented SutiExpense solution and found that this automated system was able to meet the requirements of the company. During the product installation, they faced some challenges during syncing credit cards to SutiExpense, and while copying transactions to selected expense reports. But the issues were quickly resolved by the excellent customer service provided by the support team and the implementation was very successful. With SutiExpense, expense tracking became easy and the management had better access to the information to manage the reimbursement process. The solution was able to save both time and money for the company.

Key Features of SutiExpense that Blue Rock Found Impressive

- User-friendly
 - Easy Expense Reporting
 - Customization
 - Excellent Customer Service
-

Why SutiExpense?

SutiExpense is the most suitable automated expense management solution for Blue Rock. The solution is simple, cost effective, easily installable, and customizable. The company is extremely satisfied after implementing SutiExpense and has even recommended it to their peers and has highly praised the quick response time of the customer service team with high demands from the client.

"SutiExpense is an intuitive, scalable, and easy-to-use solution to track and manage business expenses without any hassle. It has made the expense process simple for our finance team and for the rest of the employees too."
