

SutiExpense Improved Processing Speed by Over 300% for EDF Group

Working with SutiSoft has been a very pleasant experience. The company has proven to be capable of configuring the solution to meet our unique organizational needs.

- EDF Group

The Problem

EDF is a unique company whose expense management process involves many different components. The company did not have a solution in place to automate the expense process, and the manual process was a painful one, taking over a week and a half for expense reports to be approved and paid. Realizing the need for automation, EDF started looking for a user-friendly solution that helped them manage their expenses at a reasonable cost.

The Solution – SutiExpense

After looking for a solution that could meet their needs, EDF zeroed in on SutiExpense as it was highly configurable and could accommodate all of the unique expense management needs of the company. They were highly impressed by the service offered by SutiSoft's implementation team, and had a pleasant experience working with SutiSoft. There were no major challenges during the implementation and were able to get the solution up and running quickly.

About EDF Group

EDF has been present in North and South America since the late 1990's with several companies and subsidiaries, developing activities around four business lines: generation, trading, services and innovation.

EDF is present in the nuclear and gas power generation markets in the United States and South America. Its state-of-the-art nuclear power plants provide clean reliable electricity to three million homes in North America. In Brazil, Norte Fluminense, a thermoelectric power plant, supplies 22% of the electricity consumed in Rio.

As a global leader in low-carbon energy, the EDF Group covers every sector of expertise, from generation to trading and transmission grids. EDF builds on the expertise of its people, its R&D and engineering skills, its experience as a leading industry operator and the attentive support of its customers to deliver competitive solutions that successfully reconcile economic growth with climate protection.

The Improvement

Deploying SutiExpense immediately changed the way expenses were managed at EDF. The manual process that would take a week and a half now became an automated one that took an average of 30 minutes. The features of the solution and its periodic updates provided them with what they needed to manage their expenses, and today, they are realizing a huge savings in time, to the tune of more than 300%.

Why SutiExpense

- Highly configurable to meet all unique needs
 - Excellent service by the SutiSoft team
 - Smooth experience during implementation
 - Significant ROI
 - User-friendly interface
 - Affordable solution
