**"The product...delivers a great, elegant, and easy-to-use design solution."**

## BENEFITS

Achieved desired look and feel for UI.

Did not have to create icon assets from scratch.

## CHALLENGE & SOLUTIONS

Erik van Hurck was working on a project and portfolio management solution. To create an application that would function well, a clear, attractive UI was of critical importance. Making the assets for a UI from scratch was a daunting proposition. Instead, van Hurck turned to Syncfusion's Metro Studio 5 to design what he needed. "The product...delivers a great, elegant, and easy-to-use design solution for icon purposes," said van Hurck. With Syncfusion's components at his disposal, he was able to create the UI he needed for his application.
