

DADE BEHRING

Every minute of every day™

Dade Behring was interested in creating a new line of diagnostic equipment, but its developers found themselves stalled when considering which components to implement. They recognized the need for an off-the-shelf component library to give the user interface of their new product line a modern look. To do this, the company realized they would need full source code and top-notch technical support.

Rounding the Bend

Syncfusion Essential Studio offers a full suite of components with complete source code. The controls immediately gave the user interface the modern look the company was seeking, and offered programmers familiarity with components they already knew how to use. Syncfusion's Grid control's easy-to-understand, custom cell rendering examples made it easy to generate unique looking screens that fit Dade Behring's needs. Having access to comprehensive source code allowed the team to write better software, in less time.

Ahead of the Curve

Because of the support provided by Syncfusion's technical professionals through its Direct-Trac system, Dade Behring received immediate assistance and completed its programming faster.

About Dade Behring

With 2002 revenues of nearly \$1.3 billion, Dade Behring was the world's largest company dedicated solely to clinical diagnostics. It offered a wide range of products and systems designed to meet a lab's day-to-day needs, making it the best resource in the field.

The Challenge

- ★ Efficiently display large amounts of data.
- ★ Create screens to simplify complex interactions.
- ★ Provide flexible functionality.

Benefits & ROI

Attractive
component cost.

Complete source code
provided autonomy.

Savings in
development time.
