

THE SYNCFUSION SOLUTION FOR DESKTOP, MOBILE, AND DASHBOARDS

VINCENZO STRAZZULLO
CEO of STEN Tech

BENEFITS

Easy to integrate.

Cost-effective solution.

Improved team performance.

CHALLENGE & SOLUTIONS

The perspective from the CEO's office provides a vantage point for every aspect of a company, from the intangible—the company's mission, the working culture, the business model—to the quantifiable—the number of customers, the days left to deliver the product, the remaining budget.

Vincenzo Strazzullo holds that position at STEN Tech, a software company that develops web portals for health workers and patients. At the top spot, Strazzullo is acutely aware of the challenges the company must overcome daily. When faced with a troublesome combination of time crunch and limited budget, he sought a solution that would be easy to integrate into the company's existing product and provide a user-friendly UI. This led him to Syncfusion's wide array of components for ASP.NET MVC, UWP, and Xamarin, plus the Syncfusion Dashboard Platform.

With such a comprehensive, easy-to-use collection of richly featured components, Strazzullo and his team were able to enhance their application with a user-friendly UI on both desktop and mobile devices, and the Syncfusion Dashboard Platform was a great boon to providing informative, customizable dashboards in the software. Perhaps best of all, Syncfusion's components proved to be a very cost-effective solution in terms of both time and money.
